Underhood Lamp Kit

Underhood Lamp Kit adapts to any 12 volt truck and helps illuminate the engine bay. Necessary installation hardware is included. No need for wiring to a switch, bulb socket base is gravity activated; lamp comes on when hood is raised and goes out when lowered. Mount underneath hood and connect lamp wire to any constant hot vehicle wire. Moisture proof in-line fuse is integrated into wire for protection.

Installation Tip: Since all hoods and mounting locations are different, a slight adjustment to mounting bracket may be needed to assure light goes out when hood is closed. After mounting bracket and wires have been installed, apply pressure to the mounting bracket to change the angle as needed.

High Beam Headlight Relay Kit

After

Before

Since the four-headlight system was introduced in 1988 on GM pickups, the low beams would go off when the high beams are turned on. This kit will increase the intensity and improve the spread pattern by keeping all four lights on when in high beam mode.
