1971-72 Custom Grille Chevrolet

1971-72 Chevy Truck • 1/2 Ton 3/4 Ton 1 Ton
1971-72 Chevy Blazer, Suburban

Custom Chrome Steel Grille Shell has been stamped from new tooling and is made from OE-quality steel for strength and durability. Grille shells are buffed and polished to achieve a smooth, defect-free plating surface. A Triple Nickel plating process gives these grille shells an exceptionally smooth surface before final chrome plating for a high-quality, mirror-like finish. 5 Year Limited Warranty on defects in material and workmanship.

Billet Aluminum Insert is made from the highest quality materials. Face edges of the billet insert are polished; sides and back have an EDP (Electro Deposit Primer) finish. Billet crossbars have been welded to V channels which give the inserts strength without the unsightly welds found on some aftermarket inserts. Billet Aluminum Inserts come with a 2 Year Warranty.

Custom Paintable Steel Grille Shell is made from the same tooling as the Custom Chrome Steel Grille Shells and has a high-quality EDP finish which offers a smooth surface for applying your favorite color to match your truck.

Grille Shell Assemblies come with mounting hardware and hood latch release T-Rod. T-Rod mounts behind the grille shell and bumper and connects to the hood latch release handle. T-Rod allows for easy access when opening your hood.

If You Can't Find the Part You Need in this Catalog, Here's What You Should Do:

- Check local SALVAGE YARDS. Even if they do not have a truck like yours on hand, most salvage yards have access to a communication network which connects them to other salvage yards in your region of the country. Don't hesitate to ask them if you may use it.
- Check local BODY SHOPS and GARAGES for parts accumulations they may have built up over the years. You might get lucky!
- Check local WELDING and MACHINE SHOPS to see if they might be able to MAKE the part you need.

CHEVY GMC	= Chevrolet Truck,	GMC	= GMC Truck, Jimmy
	Blazer, Suburban	BLZ JIM	= Blazer and Jimmy

Chassis ID numbers are found in the body and dashboard sections. Chassis numbers will also be found in the heating, brake, electrical and other areas where change points were needed. For Chassis ID Numbers See Page 9.

Engine ID numbers are normally found in the engine section; however, they may also be used in other areas of the catalog. For Engine ID Numbers See Page 10.

Sell price you pay for one part. All items in this catalog are priced each. "Kit" and "set" normally do one (1) truck; read "REQD" column to be sure.

Steel Body Panels and What to Expect

All sheet metal is inspected before it is shipped and careful steps are taken to package parts so there is no damage during shipping. Due to the nature of the product, sheet metal is easily damaged and scratches, dents, dings and other imperfections are normal and not considered damaged. These kinds of imperfections should be expected and can be easily fixed during installation and the paint preparation, sanding and priming stages of your restoration. It is recommended you inspect all sheet metal that is delivered before the delivery driver leaves. Test fitting of all panels before installation is recommended and the use of alignment shims and other adjustments during the install may be required.

Steel Body Panels and What to Expect

All sheet metal is inspected before it is shipped and careful steps are taken to package parts so there is no damage during shipping. Due to the nature of the product, sheet metal is easily damaged and scratches, dents, dings and other imperfections are normal and not considered damaged. These kinds of imperfections should be expected and can be easily fixed during installation and the paint preparation, sanding and priming stages of your restoration. It is recommended you inspect all sheet metal that is delivered before the delivery driver leaves. Test fitting of all panels before installation is recommended and the use of alignment shims and other adjustments during the install may be required.

-T after a part number means that part must be shipped Truck Freight. An additional \$150.00 will be charged to your order for delivery in the 48 contiguous United States. Orders outside of the 48 states will be quoted. Additional delivery time required.

POR-15 Restoration Products

POR-15 is a high-performance rust preventative black paint designed to extend the life of new and rusted metal surfaces. It dries to a rock-hard, non-porous finish that will not rust, chip, crack or peel.

Dries in 2 to 5 hours; body fillers and paint can be applied over POR-15. For maximum effectiveness, degrease metal surfaces with Cleaner Degreaser, then prime with Metal-Prep.

Approximate product coverage:
1 pint = 48 sq. ft.; 1 quart = 96 sq. ft.

Dry Time Accelerator reduces the cure time of POR-15 by 30-50% without affecting the final physical properties of the paint. One 8 ounce bottle treats 64 pints or 32 quarts of POR-15.

High Temp Paint is an extreme temperature finish that maintains color without burning off or discoloring on manifolds and headers. Withstands high temperatures up to 1,200°F and resists cracking, chipping and peeling. It is weather-, salt- and moisture-resistant. Available in gray or aluminum color; can be brushed or sprayed on. Recommend sandblasting for optimal surface preparation.

Approximate coverage: 8 oz. covers a set of big block V8 headers with two coats.

Metal-Prep provides adhesion for POR-15 on any metal surface. Gently etches metal, neutralizes rust and creates an ideal anchor for coatings such as POR-15, while leaving a zinc phosphate finish to ensure chemical bonding of paint and steel. Metal-Prep must be used on galvanized metal, aluminum, stainless steel and smooth, polished or new metal surfaces prior to applying POR-15. Metal-Prep is water-based so it is not caustic, corrosive, toxic or flammable.

37-8416	METAL-PREP 1 GALLON	\$44.74

Cleaner Degreaser cleans and degreases in one application without messy residues, noxious fumes or flammable solvents. Removes grease, oil, mildew, algae, musty odors, soap films and wax from canvas, vinyl, plastics, nylon, wood, fiberglass and all metal surfaces.

Cleaner Degreaser should be used as a surface prep prior to using Metal-Prep and POR-15.

POR-15 Self Etch Primer is a quick drying and easy-to-apply coating which enables a restorer to quickly topcoat POR-15 Rust Preventive Coating and other basecoats. You can even topcoat POR-15 that's been in place for months or years. This Self Etch Primer is NOT a high-build primer, it can be sprayed on almost any painted surface and can be top coated in 15 - 30 minutes. It bonds incredibly well to POR-15 Rust Preventive Coating, and all topcoats bond incredibly well to POR-15 Self Etch Primer. It can be sanded lightly, and, if desired, multiple coats may be applied.

POR-15 Top Coat can be applied directly to a clean prepped metal surface, but when used as a top coat over POR-15 Rust Preventive Coating it provides the toughest, most permanent protection against rust and corrosion. It has exceptional long-term gloss and color retention when exposed to sunlight and the elements, non-porous, extremely scratch and chip resistant, won't crack, peel or chip. Can be applied directly to metal substrates, with no need for a primer or undercoat, and is formulated to form a robust barrier that sheds moisture.

Chassis Black has a semi-gloss appearance. For maximum durability Chassis Black should be foam coated.

Bed Liner is a water-based, rubberized coating ideal for protecting truck beds, and all other metal, aluminum, fiberglass and wood surfaces exposed to impacts and scuffs. It is UV stable and offers superior adhesion, impact resistance and flexibility. Features a textured semi-gloss black finish for good looks. Prior to application, surfaces should be degreased with Cleaner Degreaser and metal surfaces should be treated with Metal-Prep. Bed Liner can be applied over POR-15.

Shortbed trucks - 1 gallon for two coats on bed floor, sides and tailgate. Longbed trucks need an additional quart.

Windshield and Rear Window Installation Tips:

1. Fit your new window rubber to your cab first, then install the window glass.
2. Use a rubber friendly lubricant such as WD40 and the Windshield Stick (#38-0796) to ease installation and avoid damaging your window rubber.
3. Window rubber shrinks; your new window rubber may appear slightly larger than the original prior to installation.

STANDARD = Standard Rubber Seals do not have groove for trim.
CUSTOM = Custom Rubber Seals do have a groove for trim.

GREEN TINT Window has a light green tint to glass.

GRAY TINT Window has a full gray tint to glass.

SHADED Window has a full light green tint with a dark band at the top of glass.

Windshield and Glass Sealant is silicone and seals windshields, windows, sunroofs and more. Flows into leaks like water but dries to form a flexible, tough, clear seal resistant to extreme temperatures, vibration, shock and most chemicals.

Speedometer Cable Note: Due to the number of different speedometer cables Chevrolet used, it is necessary for you to measure your cable to select the correct replacement. If the replacement cable is longer, take a less direct route to your connections, keeping the cable away from hot exhaust and moving parts. Do not kink the cable during installation. Be sure to compare the end lower fittings of the cable you are replacing with the ones shown.

Sound Control Mat

Sound Control Mat reduces noise, vibration and heat created from the engine, road and structure of your vehicle. Can be applied to any interior surface area; cover as little as 25% of an area for a noticeable reduction. Each 2mm thick sheet consists of butyl rubber with a top layer of heat resistant aluminum that is easy to cut and conform to contoured surfaces, just peel and stick. Available in silver and black, each sheet measures 21" x 29".

3-in-1 Sound Control Mat combines the vibration absorption and heat resistant capabilities of the 2mm thick Sound Control Mat with an additional 5mm thick layer of foam for more efficient sound deadening. This makes it our most effective product for eliminating road noise and vibrations in your truck. Each sheet is 7mm thick and measures 19" x 31".

Low and High Hump Transmission Tunnel Cover Identification 1967-72 Pickups

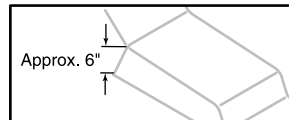

1967-72 pickup Carpet Kits, Rubber Floor Mats and MIP Mats are often defined as "Low Hump" or "High Hump" or "Small Transmission, Large Transmission." This refers to the size of the Transmission tunnel hump in the floor of the cab. Models originally equipped with 4 wheel drive or floor shift have a larger hump than 2 wheel drive, column shift models. The illustration to the right is a guide to help you verify the type of floor your truck is equipped with.

Most high hump tunnel covers are bolted to the floor.

Heavy-duty Molded Industrial Polyvinyl (MIP) Floor Mats are made of durable 1/8" thick industrial Polyvinyl and are resistant to moisture and temperature; therefore, they will not dry rot or crack and last longer than rubber. They are vacuum molded from the original floor pan to cover the entire floor, making installation easy.

Mats are easy to clean and protect your interior from water, snow, mud and most chemicals. The MIP Floor Mat includes pre-cut 36 ounce jute padding under the passenger areas to provide a higher level of insulation against heat, cold and road noise.

Installation Tip: Allow mats to lay unfolded for 48 hours at room temperature of 72° or more to help remove creases caused by packing. Test fit prior to making any permanent installations (some trimming may be necessary).

Fuel Pump Control Module

Updating your truck to an electric fuel pump? Wiring the pump to an on-off switch or to a simple ignition switched source isn't the best idea. If an accident occurs, your pump would run as long as the switch is active. With the Fuel Pump Control Module, when the key is turned, the fuel pump turns on to prime the system in a three-second cycle, just like modern vehicles. Then the module uses the tach signal so the pump only runs when engine is running, giving you quicker start-ups and improved operating safety.

Gas Tank includes 21 gallon tank, lock ring gasket, mounting straps and j-bolts.

Rear Mount Gas Tank

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton

Carpet for Models without In-Cab Gas Tank
See Page 111

Relocating the gas tank to the rear of the truck moves the fuel's weight to a more optimal location, frees up interior room and eliminates gas fumes inside the cab. Gas tanks are made from galvanized steel and fit wood or steel bed trucks. Includes lock ring, gasket, mounting straps and hardware. Tanks have a 1/4" NPT bung that can be used for a fuel return line on trucks modified with a fuel injected engine. Sending units #32-4056 and #32-4057 are available with a quick connect fitting on the fuel feed outlet.

Top fill tank lets you fill the 17-gallon tank easily on the bed floor. When installed, the filler neck is located 3" from the left of the bed centerline. On wood bed trucks this places the filler neck in the center of the wood plank, so no modifications are required to bed strips.

1967-72 Chevy & GMC Blazer, Jimmy, Suburban

JET Performance starts with a complete disassembly of a hand-selected Quadrajets carburetor core that has been cleaned and inspected. The casting plugs are sealed with epoxy to prevent leak-down into the intake manifold. All circuits are checked for proper sizing and the calibration is checked for proper jets, primary metering rods and secondary metering rods. The carburetor is then reassembled using the highest quality components with a new float, choke pull-off and bronze throttle shaft bushings.

All Stage 2 Quadrajets carburetors undergo the following upgrades: fully recalibrated idle, off idle, main, accelerator pump and high speed circuits to match any modifications done to the engine such as intake manifold, headers, ignition or mild cam change. A Stage 2 carburetor delivers improved idle quality, instant throttle response and maximum torque and horsepower.

Crossmembers ... For Lowered Trucks

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

Tubular Transmission Crossmember is designed specifically for lowered trucks with stock or custom exhaust systems. Crossmember bolts into existing holes on lower frame rail and matches up to all factory engine and transmission combinations. Low-profile design provides plenty of room to tuck exhaust up over the crossmember and keep it from hanging below the frame rail. Made with a durable black powder coat finish and includes installation hardware. Crossmember is lighter and stronger than original and is perfect for upgrading an old 3- or 4-speed manual transmission to a more popular TH350, TH400 or TH700-R4 automatic transmission.

Trailing Arm Crossmember is designed for use on lowered trucks and eliminates driveshaft clearance issues while maintaining a proper pinion angle. The dual exhaust cutouts allow up to 3" exhaust to pass through the crossmember instead of under the frame for extra ground clearance. Features 1/4" thick steel construction with a black powder coated finish. Bolt-in installation fits in the stock location. For trucks with 1-piece driveshaft only. Includes mounting hardware and instructions.

3 Ways to Lower Your Truck

Factory Truck Stance

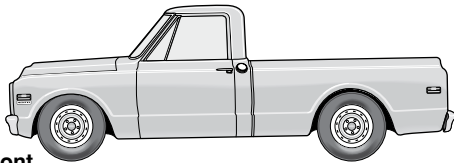

Drop is based on the original factory ride height as measured from the top of the wheel arch to the ground. Original ride height is approximately 2" higher in the rear. The stance (difference in height between the front and the rear) is not affected when you lower the front and rear an equal amount. To make your truck look level you need to lower the rear approximately 2" more than the front.

-1" front

-3" rear

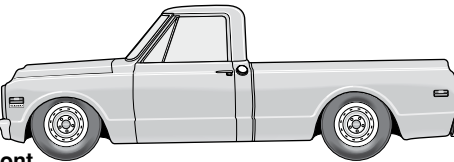

LOWER - Lower your truck with shorter Drop Coil Springs in the front and rear. This is the most economical way to lower your truck. Use rear springs that are 2" shorter than the front to level out your truck.

-2-1/2" front

-4" rear

DROP - Drop the front of your truck with Drop Spindles and the rear with Drop Coil Springs. Drop Spindles are the best way to lower your truck because they do not affect other suspension components. Original front suspension geometry and ride quality are maintained.

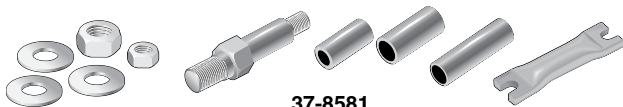

-4-1/2" front

-5" rear

SLAM - Combine front Drop Spindles and Springs with rear Drop Springs and a Frame C-Notch Kit to take your truck as low as possible. We have the parts you need to slam your classic truck for a great look and a smooth ride. Take your truck to the maximum possible "lowness".

Drop Shocks ... For Lowered Trucks

1967-72 Chevy & GMC Truck

37-8581

If dropping the front of a truck 2" or more with coil springs then shorter front shocks are needed. Drop Spindles do not affect suspension and do not require shorter shocks. If dropping the rear 4" or more then shorter rear shocks are needed.

Drop Spindle Sets ... Lower Your Truck and Convert to Disc Brakes

1967-72 Chevy & GMC Truck

Drop Spindles are the best way to lower the front of a truck without changing or affecting other components. Original ride quality, wheel offset and suspension geometry are retained. Drop Spindles can be used with Drop Coil Springs for an even lower ride.

37-8502

1967-70 Drop Spindles are made for disc brakes. A disc brake system from a 1971-72 GM truck can be used or order one of the Disc Brake Kits on page 141.

Drop Coil Spring Sets

1967-72 Chevy & GMC Truck

Drop Coil Springs are a quick and easy way to lower a truck. Use just coils or combine with Drop Spindles for an even lower ride. If dropping the front 2" or more with coil springs then shorter front shocks are needed. If dropping the rear 4" or more then shorter rear drop shocks, Frame C-Notch Kit and Adjustable Tracking Arm are needed.

Frame C-Notch Kit and Adjustable Tracking Arm

1967-72 Chevy & GMC Truck

37-8544

37-8541

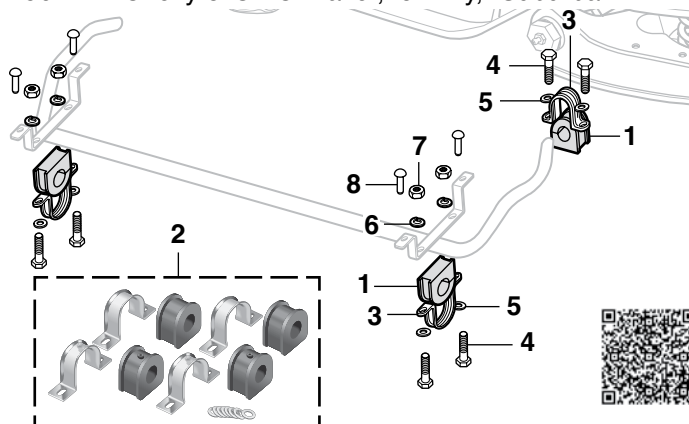

Frame C-Notch Kit provides additional clearance for rear axle travel on lowered trucks. C-notches are required on rear drops of 4" or more. Requires cutting and drilling your frame. C-notches are made from thick, 1/4" steel plates and include bump stops, grade 8 hardware and instructions.

Adjustable Tracking Arm keeps the rear axle in proper alignment on trucks that have been lowered in the rear. Double adjustable arm allows easy adjustments without removing the arm from the truck. Polyurethane bushings included.

Performance Sway Bars Give You Bolt-On Handling and Control

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

Without a sway bar, a vehicle with coil spring suspension will exhibit excess body roll on cornering, which puts extreme limits on its ability

to hold the road, resulting in poor handling and excessive tire wear. Performance Sway Bars are fully forged from hardened, high carbon steel and powder coated black for durability and provide improved balance and stability in all driving conditions. Kits include urethane end link bushings, urethane frame bushings, mounting brackets (for use on stock height and lowered vehicles) and hardware.

3" Body Lift Kit ... Makes Room for Larger Tires

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy

A Body Lift spaces the body away from the frame to make room for larger tires without altering the suspension. Body Lift Kit includes reinforced nylon spacers, compression tested to 50,000 psi and plated grade 5 hardware. Since the stock suspension is not affected, and larger tires are normally part of the plan, new shocks are recommended.

See Page 126

Read This: Installation of a body lift will change the center of gravity and the handling characteristics of the vehicle. Because of the higher center of gravity and larger tires, the vehicle will handle and react differently both on and off road. You must drive it safely! Extreme care must be taken to prevent vehicle rollover or loss of control, which could result in serious injury or death. Avoid sudden sharp turns or abrupt maneuvers and always make sure all vehicle occupants have their seat belts fastened.

A Steering Stabilizer Kit is basically a horizontal shock absorber that helps to stabilize the steering system. The kit not only helps to stabilize the steering, but can also help in the prevention of "Bump Steer", when the steering wheel jerks suddenly as a result of hitting a pothole or object in your path. These kits will also help to reduce normal wear on vital suspension pieces and make tires last longer. This kit is especially helpful for trucks whose original equipment tires have been replaced by larger or wider ones.

Steering Wheel Puller - See Page 133

Add the convenience and reliability of a new adjustable tilt wheel steering column built specifically for your truck. This is not a universal column that requires modification. Larger casting design and larger shafts and bearings provide more strength and stability in the column. Improved bearing seat with thicker 16 gauge steel and a superior welded head attachment will never loosen.

These steel columns are available in a ready-to-paint brushed finish or show-quality chrome. All columns include self-canceling turn signals, hazard warning flasher switch, knobs and handles, wiring harness, and adaptor. All of these features add strength and reliability, and every column is backed by a 3 year warranty.

Your original 1967-72 steering wheel will not fit this tilt steering column, you must use one of the Classic Foam or Classic Wood Steering Wheels on page 134 or an OE steering wheel for a 1974-94 GM truck.

Paintable steering columns are bare steel
and must be painted to protect from rust.

A Steering Wheel & Installation Kit and Shift Indicator
are required for installation of the Steering Column.

Disc Brake Proportioning Valve Components

1971-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton

The Proportioning Valve helps prevent premature rear wheel slide by limiting the amount of increase in hydraulic pressure passed to the rear brakes. This prevents the rear brakes from locking up before the full effective braking effort is produced by the front disc brakes.

Rod End Clutch Linkage Kit

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy

A new Rod End Clutch Linkage Kit replaces a worn factory clutch linkage that has failed due to metal-to-metal contact. Adjustable linkage rods feature a spherical bearing end for smooth and maintenance-free clutch operation. The durable, teflon-lined bearings are self-cleaning and require no lubrication.

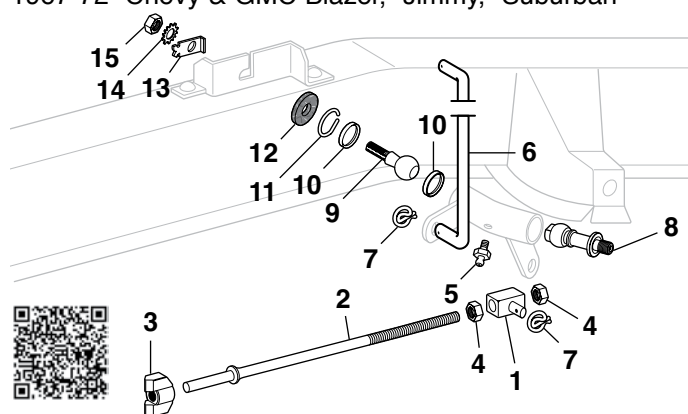

For off-road applications, the rod end design allows up to 15 degrees of pivot to accommodate for frame flex, thus reducing the risk of the clutch bellcrank coming off of the factory pivot points. Kit includes upper pushrod, lower pushrod, hardware and instructions. Call or go online and order yours today!

Wheel Bearing Grease Packer

Wheel Bearing Grease Packer quickly flushes out old grease and repacks the bearing with less the mess. The Wheel Bearing Grease Packer works on bearings up to 3 1/2" outer diameter. The grease stays in the tool cavity, not on your hands. To pack a bearing, simply place the bearing on the piston, press down on the cap until the old grease is forced out and the new grease shows on top of the bearing.

Oil Pump Priming Tool

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

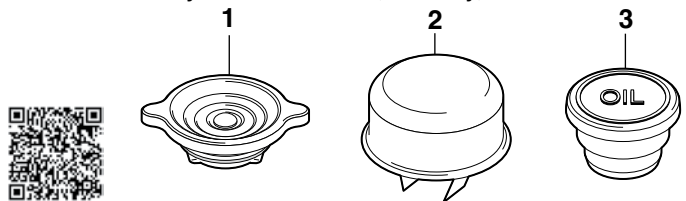

Before starting a new or rebuilt motor for the first time, it's critical to prime the lubricating system to prevent premature wear. Failure to pressurize the oil could result in a dry start that can cause camshaft, bearing and/or piston ring failure. An Oil Pump Priming Tool makes this process easy — just remove the distributor, insert the priming tool and turn it clockwise with a 3/8" drill. The tool has a machined aluminum collar that simulates the distributor and helps to eliminate damaging side loading of the oil pump drive while priming.

Manifold Vacuum Fittings and Plugs

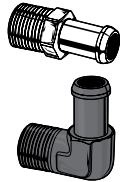

Manifold Vacuum Fittings are used to connect to engine vacuum operated components such as power brake booster, transmission modulator, vacuum advance, HVAC components, etc. These are often overlooked or broken during attempted transfer when swapping engines or intake manifolds. Manifold Vacuum Fittings are available in a 90° or T-style fitting. The 90° fitting has a single 3/8" vacuum port and the T-style fitting has a 3/8" and 1/4" vacuum port. Both styles are available in zinc-plated steel or chrome-plated aluminum.

For those simply needing to plug the vacuum port in the intake manifold, order part #30-1434. To plug the water ports in the intake manifold or water pump, order part #30-1435.

Fuel Filter

Fuel filters prevent dirt and moisture from entering the carburetor and blocking the tiny passages that could most hinder an engine's performance. A clogged fuel filter will cause the same problems as a faulty fuel pump: starting problems, stalling, backfiring and rough idling.

Oil Filter

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

A good oil filter will trap up to 90% of damaging dirt particles. It is recommended to change the oil and oil filter every 3,000 miles. If the oil filter is not changed at recommended intervals it could become clogged, allowing unfiltered oil to circulate throughout the engine, leading to expensive repairs. The cleaner the oil is, the cooler the engine will run.

36-6010

36-6003

MT = Manual Transmission

Hedman Headers offer excellent exhaust flow, reduced back pressure and improved performance. Includes hardware, 3" collector to 2-1/2" exhaust reducer, gaskets and instructions needed for installation. Tests have shown a 1.1 second improvement in 0 to 60 second times. Expect up to a 20% increase in horsepower and up to a 10% increase in gas mileage. Call or go online and order yours today!

New mid-length headers provide maximum ground clearance for lowered trucks and allow exhaust pipes to be tucked so they don't extend below the frame rails.

When installing #36-6010 it is necessary to cut existing lead pipe to attach new header adaptor pipe that is included with Header Set. When installing #36-6020 it is necessary to fabricate your own lead pipe to complete installation. Headers are painted black.

Not legal in California for use on emission controlled vehicles. 1966 and newer U.S. manufactured California Certified vehicles are considered emission controlled vehicles.

When installing headers on a truck equipped with power steering, you must order Power Steering Spacer Kit #36-6023 to retain proper belt alignment.

Header Wrap

Increase performance by keeping hot exhaust gasses inside the headers for maximum velocity, improved exhaust scavenging and protecting sensitive engine components from high temperatures.

Header Wrap is able to withstand temperatures up to 1,200°F and is made from vermiculite-coated, textured fiberglass yarn woven into a strong, flexible wrap that can easily be cut with scissors.

Available in 25 or 50 foot rolls of 1" or 2" widths. Two 50 foot rolls of 2" wide are generally enough to wrap standard V8 headers. Stainless steel locking cable ties keep the wrap securely in place. Header Wrap can void warranty of some headers. Check header manufacturer's warranty before installing.

Headers with tight bends should use 1" wide wrap for coverage. Overlap wrap 1/4" for optimum heat dissipation.

Air Conditioning Systems with Front Air Only

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

32-0577

These are complete AC, heat and defrost systems that are controlled via cable or the more trouble free electronic operation. Cable operated units are designed for use with factory AC control head (#32-0631 sold separately, see below). The unit is interior mounted under the dash and installs to the firewall. Custom metal block off plates for the under hood side of the firewall eliminate the bulky original heater box and provide a clean, smooth appearance. AC and heater fittings pass through the mounting plates with a custom rubber grommet. Step-by-step, fully detailed illustrated instructions are included.

AC Systems with compressor are designed for use with small block Chevrolet engines. Order the corresponding compressor mounting bracket and engine pulleys based on the water pump length and desired compressor mounting location for your vehicle. Kits supplied without compressor are ideal for vehicles that have swapped engines and/or already have installed an AC compressor as part of their engine's accessory drive system. All systems are designed for use with R134A refrigerant.

Non-AC Cab Models

These kits are designed for use with factory style dash vents (sold separately) and include templates for cutting dash vents on non-AC cabs. Adding the optional trinary switch upgrade #32-0543 and optional dual electric fan assembly #38-4883 will increase airflow across condenser to maximize the AC system performance.

Brackets and Pulleys

When adding AC to Chevrolet V8 engines with v-belts a 2 groove water pump pulley and a 2 groove crankshaft pulley will be required. Models with power steering will require a 3 groove crankshaft pulley.

Radiator Core Size: The height and width of the central part of the radiator between the tanks and the side pieces. Consists of parallel rows of tubes and fins.

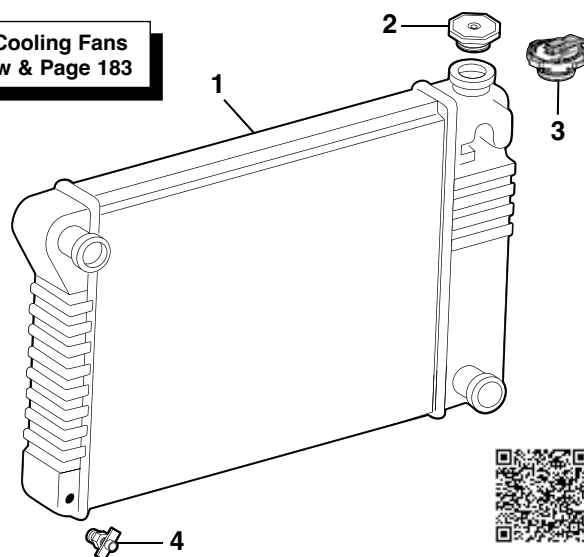

Transmission Oil Coolers: Trucks with automatic transmissions require radiators equipped with a transmission oil cooler. Radiators with oil coolers are also used on manual transmission trucks. The oil cooler portion of the radiator is simply not used.

Rows: The number of rows refers to the number of parallel rows of tubes in the core.

Dual Electric Cooling Fan Assembly

Dual Electric Cooling Fan Assembly provides increased horsepower and improved MPG. Electric fans provide increased cooling at idle when needed most and eliminate the draw of a mechanical engine-driven fan. Increased airflow across A/C condenser gives cooler, more consistent A/C temperatures at low engine speeds.

Dual Electric Fan Assemblies have a quiet S-blade design and include a wiring harness, relay, adjustable fan temperature switch, mounting brackets and installation instructions.

A/C Cooling Fan Harness activates the electric cooling fan when the A/C compressor clutch is engaged. Kit includes heavy-gauge wire harness, relay, 30 amp fuse, electrical connections and installation instructions.

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

36-2961

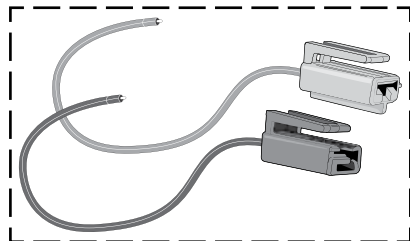

The Flame-Thrower™ is a performance proven distributor. Stable timing and precise spark distribution is provided by the patented Ignitor II electronic ignition module. The Ignitor II increases performance by adjusting the dwell angle to maintain peak energy throughout the entire rpm range. For maximum high rpm performance use the low resistance Flame-Thrower II™ Coil.

Features include low torsion, tempered .500" diameter shaft for accurate timing and longer life; housings that are CNC-machined from highly polished 6061 T-6 aluminum for strength; a top roller bearing and oil impregnated bronze sintered bottom bushing that reduce friction and vibration; a machined heat treated gear to ensure durability and a tight mesh with cam to eliminate horsepower-robbing timing fluctuations; an easily adjustable proprietary mechanical advance; high dielectric strength cap with brass terminals and premium rotor; and additional springs for setting custom advance curves. Easy installation.

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

36-2880

HEI Conversion Kit converts a mechanical breaker point ignition system into an electronic ignition for improved performance and reliability. Kit includes a new performance HEI distributor that fits small and big block Chevy engines, a high performance ignition wire set, an HEI powerlead and an ignition wire crimp tool. The higher voltage output of an HEI distributor allows larger spark plug gaps for added power, smoother throttle response and better fuel economy. Just locate a 12V power source, make the wiring connection to the included HEI powerlead with OE style connector and then plug in to the cap. The distributor is ready to install and comes complete with heavy-duty cap and rotor with brass terminals; 4 terminal ignition module and a 50,000 volt coil; low resistance, high performance 8mm black silicone ignition wire set with pre-terminated spark plug boots; all necessary distributor end terminals, boots and detailed instructions; and 1 wire hookup to ensure easy installation.

Due to varying exhaust manifold and header styles, ignition wire sets must be cut to length and the distributor end terminals must be crimped with the included ignition wire crimp tool. Choose your application based on the spark plug boot configuration (straight, 45° or 90°) that will work best for your truck. Call or go online and order yours today!

Ignitor II Electronic Ignition System

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
1967-72 Chevy & GMC Blazer, Jimmy, Suburban

Senses current level in the coil and adjusts dwell to maintain peak energy throughout the entire rpm range. Develops an average three times more available energy between 3,000 and 5,000 rpm and nearly doubles available plug voltage.

**30-Month
Warranty**

High rpm performance is improved with the Flame-Thrower II™ Coil. Peak current level is reached just prior to spark, so ignition energy is sustained with less heat build up, increasing coil and module life.

Adjusts spark timing over the entire rpm range to compensate for the inherent electronic delay, resulting in more stable timing. Senses incorrectly wired or key left on and shuts down the system, protecting the coil and other components from damage.

NEW**Cut to Fit Battery Cables**

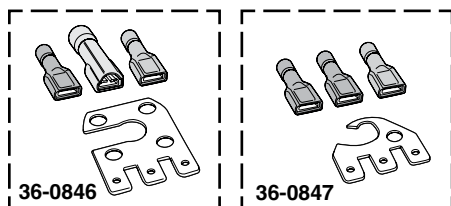

Chevy & GMC

Tired of having to use pre-made lengths of battery cables, having way too much left over or just plain too tight after it's installed? Then try these new cut to fit battery cables that you can route as you see fit for a cleaner look, rather than an "it is what it is" look. Simply cut the outer sheath back, solder which terminal you need for your truck (solder pellet and terminals included) and finish the cable off with the shrink tube provided.

These cables are not OEM replacements, they are made for gas applications only and provide one cable with a top or side mount battery end.

Driving Light Set

See Page 198

38-1274

Driving lights provide a longer, more focused beam pattern for improved long-range vision. Features include reinforced steel housing with black finish and adjustable chrome mounting bracket with 10mm mounting stud; and state-of-the-art reflector which gives maximum light output from a 4-1/2" diameter light. Lights are complete with illuminated push button switch, 12-volt relay, all necessary wiring, mounting hardware, protective lens covers and high efficiency halogen 12V 55W replaceable bulbs.

For added style, replace the white halogen bulb with a halogen blue-coated bulb. The blue-coated bulb creates an intense white light which gives the cool look of HID (high intensity discharge) lighting without the high price.

LED Lighting

1967-72 Chevy & GMC Truck • 1/2 Ton 3/4 Ton 1 Ton
 1967-72 Chevy & GMC Blazer, Jimmy, Suburban
 New technology previously only on high-end luxury cars is now available for trucks! LEDs quickly alert other drivers of your intentions with LED bulbs that illuminate 140 times faster than conventional incandescent bulbs, which translates to a gain of 20+ feet of reaction distance.

Additional LED benefits:

LED lights have no filament, which means they are less sensitive to vibrations, and they can last up to 20,000 hours. They use only 15% of the energy required by incandescent bulbs, reducing the load placed on your truck's charging system, and less heat is emitted.

An Electronic Flasher is recommended when upgrading to LED bulbs or light assemblies. Due to the lower current draw of LED lighting, the factory flasher may cause inconsistent flash rates, no flash or indicate that a bulb is out.

If the package looks damaged when it arrives, open it with the delivery person present, so that they can make an immediate report of damages and discrepancies. If the damage is not obvious at the time of delivery, or if the package was left for you by the shipping company, contact their customer service as soon as possible to make your claim.

On Truck Freight shipments, it is your responsibility to check your order and have the driver note any damage on the freight bill before you sign for your item(s).

Please keep all packing, packaging and contents until your claim has been settled with the shipping company.

Tired of having to use pre-made lengths of battery cables, having way too much left over or just plain too tight after it's installed? Then try these new cut to fit battery cables that you can route as you see fit for a cleaner look, rather than an "it is what it is" look. Simply cut the outer sheath back, solder which terminal you need for your truck (solder pellet and terminals included) and finish the cable off with the shrink tube provided.

It's Green and, Boy, Does it Go!

James Rast and His 1967 Chevy C10

The story of the GREENGO.

Back in 2008, my youngest son asked to rebuild a truck. He had seen his PawPaw's old truck behind the barn. But we needed a better frame. I found a SWB stepside that we always wanted.

10 years later, one Saturday at a time. Many greasy hands and dirty brows, frustrated minds and prayers to the good

Lord. Parts from all over, including LMC Truck. This baby was built from full frame-off restoration and came roaring to life with a built 383 Stroker motor.

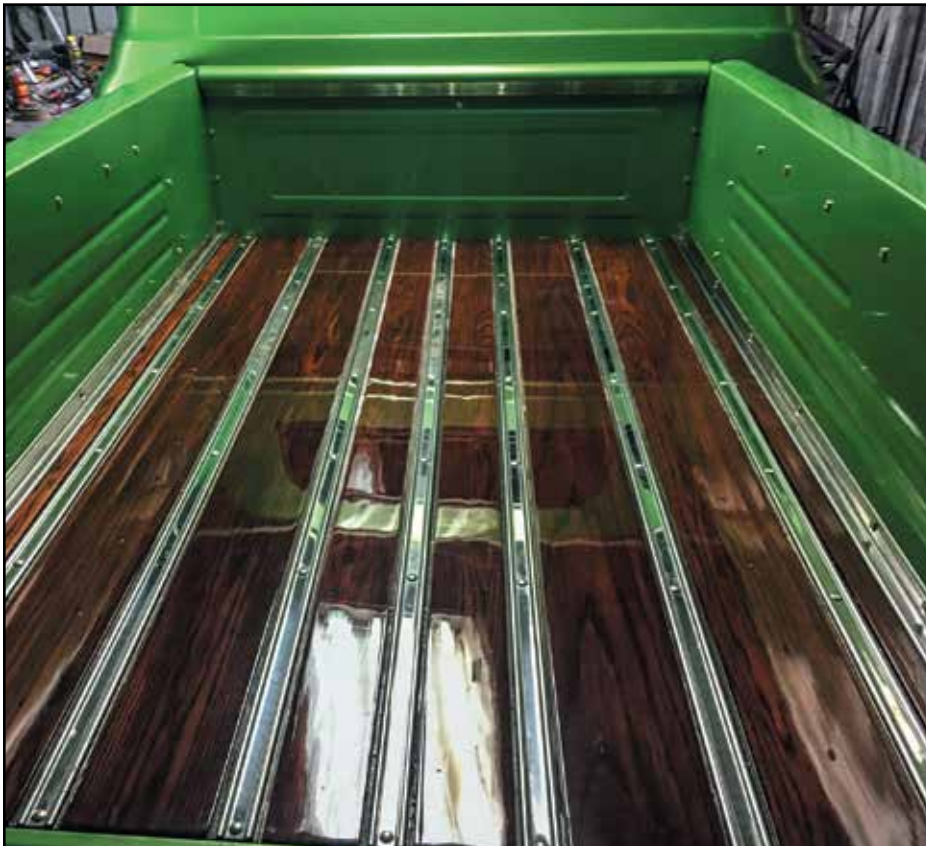

Where she got her name "GREENGO"

It's green and, boy, does it GO!

It takes GREEN to make it Go!
