I have a picture in my office. It was an aerial photograph taken in the '60s of the farm we lived on in rural Iowa. To be exact, RR1, Anamosa, IA, before every address had a house number and a private line telephone. We had a party line phone with 8 people on it, well, that is a whole letter to itself along with the Sears and Roebuck catalog, that had everything from toys to a house you could buy and build.

It was a thing back then, and still is now, that a plane flies over, takes a picture and then sells it to you. We aren't going to get into the right or wrong of that idea right now. Instead I am going to say I am grateful that day they flew over and my parents somehow had the money to buy that picture.

It hangs in my office alongside the serenity prayer. It is there to remind me of who I am and where I come from. That my mom and dad somehow raised 5 kids in a 2-bedroom house until Uncle Dewayne converted the garage to a bedroom for them in the late '60s. That you can exist without a shower and only a bathtub, that you got three TV stations if the rabbit ears were just right and wrapped in aluminum foil, and the only thing you were allowed to watch were Gunsmoke, Rawhide, and Wild Kingdom. Oh, and can't forget The Andy Williams Show. That Sunday morning was church and then grandma's fried chicken and gravy. My grandmother was younger then than I am now. I hadn't really thought about that until I started typing out this letter.

The picture is before my grandfather put the orchard in for them and the feed lot went in. It had to be the early '60s that this picture was taken. Before mom let me put in my own flower beds and I went into the woods and dug up what I wanted to plant and tried to graft or cross-pollinate. Before my mom and I had our first and only big fight over Vietnam. I was a pacifist and plant-loving, earth-loving girl, even back then, who drove her dad's old truck long before I was old enough because the sheriff would just know I was Harold's daughter.

I have been nostalgic lately. I think it is because I turn 69 in January and have outlived my parents and two of my brothers. My parents died young. My dad was only 58, so when you are older than your parents were when they died, your brain can overthink things.

At every level I know I have a great life, with two daughters with beautiful families, and I have been truly blessed. But deep in my heart I am still that young pacifist, plant-loving, earth-loving girl who just wants to garden and drive the old truck. The shorter, colder days were always my time to slow down and think about my next chapter, until COVID, and then it was just hurry and scramble and work. This year I am taking time off work to reflect and make decisions about my last chapter. I want to go into the woods, find the plants that only grow there, and try them in my wildflower garden. I want to drive the '72 Cheyenne into "town" with my grandsons to get ice cream. I will never leave LMC or sell it, but it is time for me to enjoy and spend more time with my grandchildren and daughters. Maybe only work 50 hours a week!

## If You Can't Find the Part You Need in this Catalog, Here's What You Should Do:

1. Check local SALVAGE YARDS. Even if they do not have a truck like yours on hand, most salvage yards have access to a communication network which connects them to other salvage yards in your region of the country. Ask them if you may use it, if necessary.
2. Check your local BODY SHOPS and GARAGES for parts accumulations they may have built up over the years. You might get lucky!
3. Check local WELDING and MACHINE SHOPS to see if they might be able to MAKE the part you need.

**LMC TRUCK** is in no way affiliated with the Ford Motor Company nor do we intend to imply that. The name Ford is used for reference only.

*Applications listed in this catalog are based on original factory information. However, variances will occur due to non-documented substitutions, and changes made during the vehicle's production.*

## 1948-9/15/51 Vehicle Identification

### Where to Find Your Vehicle Identification Number (VIN)

For 1948-51 Fords the VIN plate is located on the glove box door, clutch housing or on the left side of the frame near the steering gear mounting bracket. The information on the rating plate is the VIN number. The first four digits of the VIN number indicate year, series and number of cylinders. The last six digits indicate the production sequence.

**Series Prefix:** F1 = 1/2 Ton F3 = 3/4 Ton Heavy-Duty / 1 Ton  
F2 = 3/4 Ton F4 = 1-1/4 Ton

### Key Information

- 1948:** The 1948 trucks were redesigned, featuring wider, longer, and taller cabs. Model designations were changed as well; the 1/2 ton trucks were known as F1s. Although the F3 is classified as a 3/4 ton truck, actual payload is over one ton.
- 1949:** The most noticeable change on the 1949 trucks was the deletion of the red pinstripes on the silver painted grille bars. Also, wheels were painted to match body color, rather than the previous black.
- 1950:** A running change on the F1s was the relocation of the standard three-speed shift lever to the steering column from the floor. No other changes were made.
- 1951:** The 1951 trucks were restyled with a single bar type grille and a headlight at each end of the grille bar. The grille was painted argent (silver) to complement the chrome headlight bezels. During the model year, the grille was painted ivory and the headlight rings argent (silver). The hood got new side spears and a three slot embellishment at the front. The front bumper was redesigned. A V-8 emblem was used on the upper grille support on trucks that were so equipped. The pickup bed and tailgate were redesigned. The bed used a hardwood floor instead of the previous all metal floor. The rear window was larger. Door panels were added.

#### Production Sequence (Series #)

### Key Information

- 1952:** Most of the exterior changes on the 1952 trucks were cosmetic. In the front, the Ford name was once again affixed to the upper grille support panel. The V-8 emblem was located in the center of the hood vent on models so equipped. On the sides of the hood, a round emblem indicating the model designation was added to the side spears. The front grille was painted white, as was the front trim work on the hood. In addition, the front fender braces were deleted.

### Where to Find Your Vehicle Identification Number (VIN)

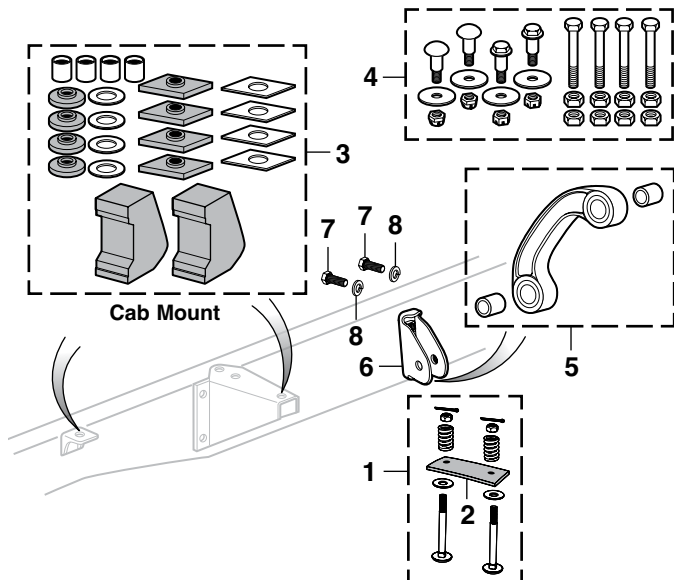

For 1953-56 Ford the VIN plate is attached to the rear face of the driver's door or glove box door. The information on the rating plate is the VIN number. The VIN number identifies the series, engine, model year, assembly plant and production sequence.

- 1953:** Because 1953 was Ford Motor Company's fiftieth anniversary, all trucks were equipped with a Fiftieth Anniversary horn button. Also new was the Ford truck crest, which was located on the front of the hood.
- 1954:** Styling changes on the 1954s were mostly visible in the new "strut-mounted" grille design. In the engine compartment, the standard Cost Slipper six-cylinder engine was bored to 223ci. The big change, though, was the introduction of a new Power King V-8 engine, known as the Y-block.
- 1955:** Visually, the 1955 models got a new V-type grille that was painted white; inside the V was a star emblem denoting a six-cylinder engine or a V-8. Wheels on the F100s were painted Snowshoe White, and parking lamps and hoodside medallions were new. Two-tone paint was optional.
- 1956:** Styling changes for 1956 amounted to a new, wraparound windshield and a different grille, and recessed headlights were new. The electrical system was upgraded from 6 volt to 12 volt. The F100 was given the option of either the 110" wheelbase Shortbed or the 118" wheelbase Longbed. The Longbed remained standard for the F250. Automatic-equipped trucks came with Ford-O-Matic script under the hood crest.

**Steel Body Panels and What to Expect**

All sheet metal is inspected before it is shipped and careful steps are taken to package parts so there is no damage during shipping. Due to the nature of the product, sheet metal is easily damaged and scratches, dents, dings and other imperfections are normal and not considered damaged. These kinds of imperfections should be expected and can be easily fixed during installation and the paint preparation, sanding and priming stages of your restoration. It is recommended you inspect all sheet metal that is delivered before the delivery driver leaves. Test fitting of all panels before installation is recommended and the use of alignment shims and other adjustments during the install may be required.

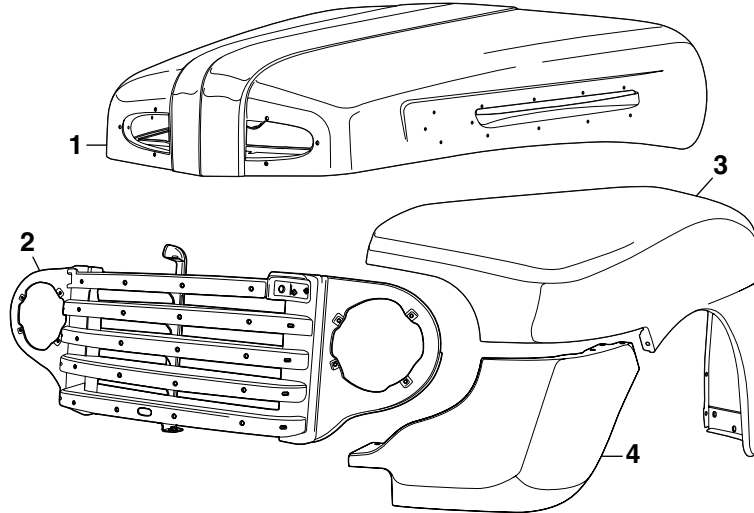

\* Or \*\* after the sell price means your order will incur an Oversize Part Charge for each oversized part. \* Means extra charge will be \$20. \*\* Means extra charge will be \$50. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.

## Steel Body Panels and What to Expect

All sheet metal is inspected before it is shipped and careful steps are taken to package parts so there is no damage during shipping. Due to the nature of the product, sheet metal is easily damaged and scratches, dents, dings and other imperfections are normal and not considered damaged. These kinds of imperfections should be expected and can be easily fixed during installation and the paint preparation, sanding and priming stages of your restoration. It is recommended you inspect all sheet metal that is delivered before the delivery driver leaves. Test fitting of all panels before installation is recommended and the use of alignment shims and other adjustments during the install may be required.

\* Or \*\* after the sell price means your order will incur an Oversize Part Charge for each oversized part. \* Means extra charge will be \$20. \*\* Means extra charge will be \$50. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.

## POR-15 Restoration Products

**POR-15** is a high-performance rust preventative black paint designed to extend the life of new and rusted metal surfaces. It dries to a rock-hard, non-porous finish that will not rust, chip, crack or peel.

Dries in 2 to 5 hours; body fillers and paint can be applied over POR-15. For maximum effectiveness, degrease metal surfaces with Cleaner Degreaser, then prime with Metal-Prep.

**Approximate product coverage:**  
1 pint = 48 sq. ft.; 1 quart = 96 sq. ft.

**Dry Time Accelerator** reduces the cure time of POR-15 by 30-50% without affecting the final physical properties of the paint. One 8 ounce bottle treats 64 pints or 32 quarts of POR-15.

PART	DESCRIPTION	PRICE
37-8411-F	POR-15 SEMI-GLOSS-1 PINT	\$43.95
37-8412-F	POR-15 SEMI-GLOSS-1 QUART	\$66.95
37-8408-F	POR-15 GLOSS-1 PINT	\$41.88
37-8409-F	POR-15 GLOSS-1 QUART	\$63.89
37-8418-F	DRY TIME ACCELERATOR	\$34.05

**High Temp Paint** is an extreme temperature finish that maintains color without burning off or discoloring on manifolds and headers. Withstands high temperatures up to 1,200°F and resists cracking, chipping and peeling. It is weather-, salt- and moisture-resistant. Available in gray or aluminum color; can be brushed or sprayed on. Recommend sandblasting for optimal surface preparation.

**Approximate coverage:** 8 oz. covers a set of big block V8 headers with two coats.

PART	DESCRIPTION	PRICE
37-8484-F	HIGH TEMP PAINT-GRAY 8 OZ	\$25.51
37-8485-F	HIGH TEMP PAINT-ALUM 8 OZ	\$25.51

**Metal-Prep** provides adhesion for POR-15 on any metal surface. Gently etches metal, neutralizes rust and creates an ideal anchor for coatings such as POR-15, while leaving a zinc phosphate finish to ensure chemical bonding of paint and steel. Metal-Prep must be used on galvanized metal, aluminum, stainless steel and smooth, polished or new metal surfaces prior to applying POR-15. Metal-Prep is water-based so it is not caustic, corrosive, toxic or flammable.

37-8415-F	METAL-PREP 1 QUART	\$22.14
37-8416-F	METAL-PREP 1 GALLON	\$44.74

**Cleaner Degreaser** cleans and degreases in one application without messy residues, noxious fumes or flammable solvents. Removes grease, oil, mildew, algae, musty odors, soap films and wax from canvas, vinyl, plastics, nylon, wood, fiberglass and all metal surfaces.

Cleaner Degreaser should be used as a surface prep prior to using Metal-Prep and POR-15.

PART	DESCRIPTION	PRICE
37-8413-F	CLEANER DEGREASER 1 QUART	\$14.67
37-8414-F	CLEANER DEGREASER 1 GALLON	\$29.95

**POR-15 Self Etch Primer** is a quick drying and easy-to-apply coating which enables a restorer to quickly topcoat POR-15 Rust Preventive Coating and other basecoats. You can even topcoat POR-15 that's been in place for months or years. This Self Etch Primer is NOT a high-build primer, it can be sprayed on almost any painted surface and can be top coated in 15 - 30 minutes. It bonds incredibly well to POR-15 Rust Preventive Coating, and all topcoats bond incredibly well to POR-15 Self Etch Primer. It can be sanded lightly, and, if desired, multiple coats may be applied.

**POR-15 Top Coat** can be applied directly to a clean prepped metal surface, but when used as a top coat over POR-15 Rust Preventive Coating it provides the toughest, most permanent protection against rust and corrosion. It has exceptional long-term gloss and color retention when exposed to sunlight and the elements, non-porous, extremely scratch and chip resistant, won't crack, peel or chip. Can be applied directly to metal substrates, with no need for a primer or undercoat, and is formulated to form a robust barrier that sheds moisture.

**Chassis Black** has a semi-gloss appearance. For maximum durability Chassis Black should be clear coated.

**Bed Liner** is a water-based, rubberized coating ideal for protecting truck beds, and all other metal, aluminum, fiberglass and wood surfaces exposed to impacts and scuffs. It is UV stable and offers superior adhesion, impact resistance and flexibility. Features a textured semi-gloss black finish for good looks. Prior to application, surfaces should be degreased with Cleaner Degreaser and metal surfaces should be treated with Metal-Prep. Bed Liner can be applied over POR-15.

Shortbed trucks - 1 gallon for two coats on bed floor, sides and tailgate. Longbed trucks need an additional quart.

**Approximate product coverage:**  
1 quart = 25-30 sq. ft.; 1 gallon = 100-120 sq. ft.

**Fuel Tank Sealer** coats the inside of your tank to stop rust and seal pinholes and weld seams. It's a non-porous, flexible film that is resistant to all fuels, alcohols and fuel additives. This environmentally safe sealer does not contain the harmful chemical Methyl Ethyl Ketone (MEK) and is non-flammable. Cleaner Degreaser and Metal-Prep must be used to prep fuel tank prior to using fuel tank sealer.

**Approximate product coverage:**

**TINTED** Window has a full light green tint to glass.

## Windshield and Rear Window Installation Tips:

1. Fit your new window rubber to your cab first, then install the window glass.
2. Use a rubber friendly lubricant such as WD40 and the Windshield Stick tool (#38-0796-F) to ease installation and avoid damaging your new window rubber.
3. Window rubber shrinks; your new window rubber may appear slightly larger than the original prior to installation.

**STANDARD** = Standard Rubber Seals do not have a groove for trim.

**CUSTOM** = Custom Rubber Seals do have a groove for trim.

-T after a part number means that part must be shipped Truck Freight. An additional \$150.00 will be charged to your order for delivery in the 48 contiguous United States. Orders outside of the 48 states will be quoted. Additional delivery time required.

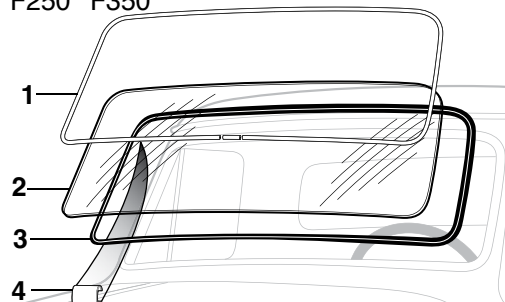

**38-0783-F**

**Windshield and Glass Sealant** is silicone and seals windshields, windows, sunroofs and more. Flows into leaks like water but dries and forms a flexible, tough, clear seal resistant to extreme temperatures, vibration, shock and most chemicals.

\* Or \*\* after the sell price means your order will incur an Oversize Part Charge for each oversized part. \* Means extra charge will be \$20. \*\* Means extra charge will be \$50. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.

## Glass Tools

**38-0796-F**  
\$.99

**Windshield Stick** A glass installer's most useful tool! Can be used to install or remove windows or window rubber. This plastic tool measures 8" in length for an easy grip.

**38-0763-F**  
\$7.95

**Hook Tool** helps remove and install rubber mounted glass. The tool has an angled end for easier fitting of the glass inside the rubber seal. Features a round steel ball on the tip to protect against damage to the rubber seal, glass and painted surfaces.

**38-0762-F**  
\$12.95

**Rope-In Tool** inserts 1/4" diameter nylon rope through its stem and seats it in the groove of the seal as it is pulled around the perimeter of the seal. With the glass properly positioned on the vehicle, simply pull the rope and the seal then pops over the pinchweld to hold the glass firmly in place. Includes enough rope to fit around even the largest truck windows.

## Exterior Rubber

1948-52 F1 F2 F3

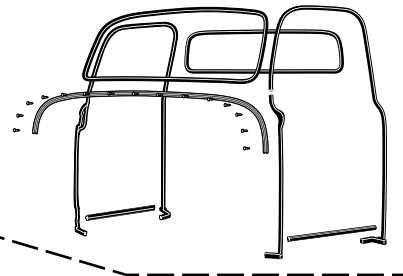

**#42-0759 Weatherstrip Adhesive** is a water resistant adhesive for bonding rubber and metal surfaces. Withstands extreme temperatures, dries black.

### 1/8" Thick Molded Industrial Polyvinyl (MIP) Floor Mats

Shiftrod Holes  
are Not Pre-cut

All MIP Mats are Only  
Available in Black

Heavy-duty Molded Industrial Polyvinyl (MIP) Floor Mats are made of durable 1/8" thick industrial Polyvinyl and are resistant to moisture and temperature; therefore, they will not dry rot or crack and last longer than rubber. They are vacuum molded from the original floor pan to cover the entire floor, making installation easy.

Mats are easy to clean and protect your interior from water, snow, mud and most chemicals. The MIP Floor Mat includes pre-cut 36 ounce jute padding under the passenger areas to provide a higher level of insulation against heat, cold and road noise.

**Installation Tip:** Allow mats to lay unfolded for 48 hours at room temperature of 72° or more to help remove creases caused by packing. Test fit prior to making any permanent installations (some trimming may be necessary).

## EVA Sound Deadener

1948-52 F1 F2 F3  
1953-56 F100 F250 F350

49-6032

**Installation Tip:** To reach the maximum level of sound dampening and insulation, use Multi-Purpose Insulation, #38-2829-F, **see below**, to cover any areas not protected by the EVA Sound Deadener. Use #38-0798-F Spray Adhesive, #42-0759 Weatherstrip Adhesive and #38-0716-F Aluminum Tape to install sound deadener and insulation.

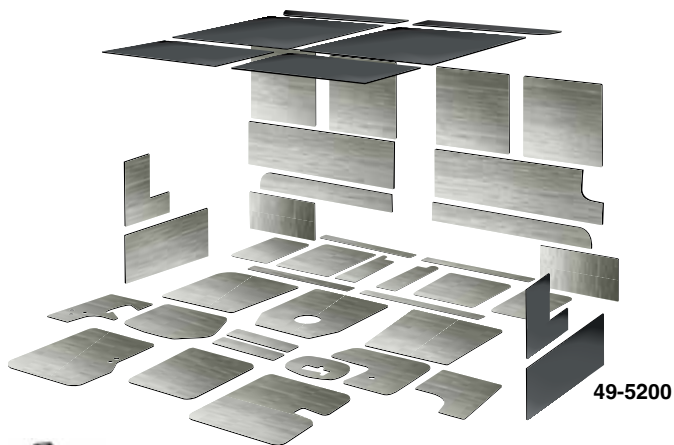

49-6034

## EVA Sound Deadener Kit

This Sound Deadener Kit is die cut for easy installation. Made from OE type, 1/16" thick Ethyl Vinyl Acetate (EVA) which is asphalt based material for sound dampening. Applies directly to the cab floor. Reduces road noise and cab harmonics to give you a quieter ride and also helps to insulate against heat and cold.

## Pre-Cut Insulation Kit

49-5200

Reduce noise and heat transfer inside your truck with a Pre-Cut Insulation Kit. Each panel has been cut to fit a specific location and a self-adhesive backing allows for fast and easy installation. Lightweight panels are foil over foam that vary between 2mm and 5mm thick. Pre-cut kits include thermal acoustic panels for the floor, doors, cab wall and roof. A 2" wide roller, sold separately, helps ensure full adhesion.

## Sound Control Mat

**Sound Control Mat** reduces noise, vibration and heat created from the engine, road and structure of your vehicle. Can be applied to any interior surface area; cover as little as 25% of an area for a noticeable reduction. Each 2mm thick sheet consists of butyl rubber with a top layer of heat resistant aluminum that is easy to cut and conform to contoured surfaces, just peel and stick. Available in silver and black, each sheet measures 21" x 29".

**3-in-1 Sound Control Mat** combines the vibration absorption and heat resistant capabilities of the 2mm thick Sound Control Mat with an additional 5mm thick layer of foam for more efficient sound deadening. This makes it our most effective product for eliminating road noise and vibrations in your truck. Each sheet is 7mm thick and measures 19" x 31".

## Multi-Purpose Heat and Sound Insulation

Uses Space Age technology to insulate against heat, cold and noise under hoods, carpeting, headliners, door panels, firewalls or seats as well as other household uses. This 4-foot x 6-foot sheet is made of 3/8" sound deadening fiber padding. Highly reflective aluminum is bonded on one side to achieve 97% reflection of radiant heat. Use this Multi-Purpose Insulation with Sound Control Mat for maximum sound deadening. Call or go online and order both today!

Use #38-0798-F Spray Adhesive and #38-0716-F Aluminum Tape or #42-0759 Weatherstrip Adhesive to easily install Insulation Material.

## Dakota Digital VHX Gauge Clusters

1948-50 F1 F2 F3

Bring your truck into the 21st century with Dakota Digital's VHX Gauge Clusters which are designed to fit your stock dash without modifications.

The billet aluminum bezel has been precision machined and chromed to perfection. The dual LCD message centers can be fully configured to display just about any piece of information needed like MPH, odometer, gear selection, and mileage, plus incorporate expandability to mesh with late model and diesel drivetrain conversions.

The white backlit gauges include speedometer, tachometer, oil pressure, water temperature, volts and fuel level and each analog gauge sweep (except speedometer) contains a red LED indicator for quick notice of a warning condition and feature fully-lit needles and backlit faces. Additional features include the micro-controlled precision stepper motors and solid-state sensors for unparalleled accuracy. Detailed installation instructions and operation manual included.

Period-styled and themed gauges for your classic truck. New Vintage USA gauge clusters easily interface with original engines as well as high-tech late-model engines, ignition systems, PCMs and speed sensors including GPS. High-tech mini-OLED displays give additional information with easy-to-read menus, set-up and programming features. Gauges have built-in performance timers, speed warnings and shift alert. Accepts additional auxiliary inputs without requiring separate modules. All parts are direct-fit designs that fit the stock gauge mounting locations without any cutting or modification required. Made in Detroit, Michigan and backed by a 5-year warranty.

### Each gauge cluster contains:

- Sending units for oil pressure, water temperature and vehicle speed.
- Programmable speedometer, including trip meter and standard odometer.
- LED indicators for turn signals, high beams and auxiliary warning lamps.
- Easy-to-follow detailed installation instructions included.
- Programmable fuel gauge works with original and aftermarket fuel sending units.

## GPS Speed Sending Unit

Make speedometer calibration a thing of the past, with the GPS Speedometer Sending Unit for your New Vintage USA Gauge Cluster. No longer will you have to recalibrate your speedometer after tire or differential gearing changes, as the GPS signal updates quickly and provides a precise reading for your speedometer to display. Can be mounted under your dash.

## Dakota Digital HDX Gauge Clusters

HDX Gauge Clusters add a modern look to your classic truck with a choice of black or silver alloy gauge-face styling. The built-in, capacitive-touch buttons let you easily change calibration and personal settings. Each needle hub is black nickel plated spun-aluminum to match the face-mounted buttons.

The digital message center can be configured to display just about any piece of information needed. Over 30 user-selectable LED color options are available with 12 factory preset color themes. Fully lit color needles, back-lighted color faces and a full color message center are dimmable for driving at night. Each analog gauge sweep (except speedometer) contains a red LED indicator for quick indication of a warning condition. Gauge clusters can also be completely configured through Bluetooth with Dakota Digital's Android and Apple free mobile app.

Includes water temp, oil pressure, and speed sensors. Existing fuel sending unit can be used. Detailed installation instructions and operation manual included. Optional expansion accessories add functionality and allow additional gauge readings to be displayed.

## Dakota Digital OBD-II/CAN Interface

PART	DESCRIPTION
47-1843	OBD-II/CAN INTERFACE

Dakota Digital OBD-II/CAN Interface allows you to plug directly into the engine diagnostic port (on equipped models), extracting engine and transmission data from the vehicle's computer. The interface will collect and output the following information to Dakota Digital RTX and HDX gauge clusters: vehicle speed, engine speed, engine temp, check engine indicator, intake air temp, transmission temp, ambient temp, gear position and oil pressure. Available data varies by model.

## GPS Speed/Compass Sender

PART	DESCRIPTION
47-1841	GPS SPEED/COMPASS SENDER

Dakota Digital GPS Speed/Compass Sender is a simple connection to the gauge cluster that adds accurate speed information, compass heading, altimeter data, and automatic clock syncing, all with fully automatic calibration! No DIP switches, no guessing, no inaccuracies, period.

REQD	PRICE
(1)	\$213.70

## Dakota Digital RTX Gauge Clusters

RTX Gauge Clusters are focused on retaining the stock look without sacrificing late-model features. Every effort has been made to incorporate OEM design elements regarding the layout, face styling and indicators. A casual glance may dismiss these as original equipment, but once you turn the key and the LED backlighting comes on in your favorite color scheme, all doubts will be removed. A hidden rocker switch provides quick access to all settings and functions.

The digital message center can be configured to display just about any piece of information needed. Over 30 user-selectable LED color options are available with 12 factory preset color themes. Fully lit color needles, back-lighted color faces and a full color message center are dimmable for driving at night. ## White Face Gauge Overlays

White Face Gauge Overlays are computer printed on vinyl and pre-cut for a precise fit. They install easily over stock gauge faces without removing the gauge needles (except clock) and use the stock gauge lighting. No worries of broken needles or need for recalibrating gauges. Overlays will not wrinkle or bubble in hot or cold temperatures and can be removed with direct heat. Installation instructions included.

## Now You Can Be Sure All Your Interior Colors Match

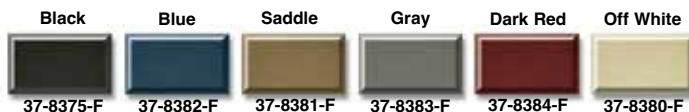

ColorBond permanently changes the color of your interior. Sprays on and dries to the touch in 45 seconds, forming a complete bond in 10 minutes. Original grain pattern is never altered or hidden, no matter how many times ColorBond is applied. Will not crack, flake, peel or rub off from solid or flexible materials because the color becomes part of the surface.

### ColorBond can be used on:

- Vinyl
- Leather
- ABS Plastic
- PVC
- Polyurethane
- Polycarbonate
- Lexan
- Acrylic
- Recycled Plastics
- Carpet
- Cloth Upholstery

**\$20.95 each**

ColorBond is a semi-gloss finish that is OEM approved, UV stable and colorfast. Each 12 ounce can will cover 7 square feet. ColorBond Prep/Cleaner should be used prior to applying ColorBond.

## Spitshine Tire Black ... Bring Back the Shine

**37-8370-F**  
\$21.45

*Not for use on tires with white lettering or sidewalls.*

**ColorBond Spitshine Tire Black** is a specially formulated paint, not a clear silicone dressing, designed to restore a military shine to faded and scuffed tires for a minimum of two months. Spitshine is not greasy or tacky, so it won't attract unsightly dirt and dust. Each 12 ounce can is easy to apply; first, clean tires of any existing dressings, silicones and dirt with ColorBond Prep/Cleaner. Mask the wheel or rim and apply in light coats. Reapply Spitshine Tire Black if tires become scuffed.

## Rear Mount Gas Tank

Carpet for Models with  
Rear Mount Gas Tank  
See Page 49

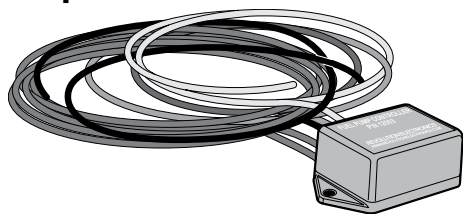

Replacing a side frame rail or in-cab gas tank with a rear frame rail mount aluminum tank moves the fuel's weight, adding traction to the rear wheels of the truck. Gas tank could also be used as an auxiliary tank for extra fuel reserve.

This baffled 17-gallon bed-fill aluminum gas tank is flanged for frame rail mounting and includes fuel line fittings. Additional parts will be necessary to complete the installation. A sending unit, flush-mount fuel filler, filler hose, anti-squeak kit and hardware kit will need to be added; each sold separately. Sending units will work with 6 volt or 12 volt systems. A hole cut in the bed floor for the fuel filler, an extension of the fuel feed line and sending unit wires and relocation of the frame mounted spare tire will be needed. Flush-mount fuel filler is available in polished finish with pop-up twist knob. Order the filler hose to make the connection between the fuel filler and rear mount tank.

## Fuel Pump Control Module

Updating your truck to an electric fuel pump? Wiring the pump to an on-off switch or to a simple ignition switched source isn't the best idea. If an accident occurs, your pump would run as long as the switch is active. With the Fuel Pump Control Module, when the key is turned, the fuel pump turns on to prime the system in a three-second cycle, just like modern vehicles. Then the module uses the tach signal so the pump only runs when engine is running, giving you quicker start-ups and improved operating safety.

## KYB Shock Absorbers ... Driving Control, Even Ride and Performance Handling

### Gas-A-Just Shock Absorbers

You can depend on Gas-A-Just for unsurpassed road control. KYB Gas-A-Just shocks are America's best selling monotube gas shocks. They feature higher gas pressure to keep your truck's tires glued to the road surface. They provide unsurpassed control on even the most demanding roads. Monotube design and high pressure gas eliminate the age old problem of performance fade by eliminating aeration and foaming, a problem with other shocks that use two-tube construction that allows air to mix with fluid.

### GR-2 Gas Shock Absorbers

The KYB GR-2 Shock Absorbers give you a satin ride at an economical price. They feature lower pressure for riding comfort, along with improved handling and response only gas shocks can provide. The GR-2 gas shock absorber is the economical way to step up from hydraulic shocks to the quality ride and control of gas.

45-2916

Dual-Flex Front Springs are designed using the latest leaf spring technology. Features dual leaf construction that offers better ride quality while providing a 3" lower than original ride height. Springs include new u-bolts and spring eye bushings for easy installation.

45-3026

Super Slide Rear Springs are computer-assisted designed to provide a smoother ride and a 3" lower than original ride height. These springs incorporate moly-nylon Super Slide Buttons that reside in die-formed pockets at the tips of the spring leaves. Springs include spring eye bushings for easy installation.

## Performance Sway Bars Give You Bolt-On Handling and Control ... Drive Faster Through Turns with Improved Traction

Improve the handling ability and cornering traction of your vehicle with a Performance Sway Bar. Too much weight transfer in a corner destroys a vehicle's road-holding ability, causing the wheels to "drift" or "creep" sideways in the turn, resulting in poor handling and excessive tire wear. Sway bars give your vehicle the balance and stability it needs in curves, passing situations and uneven surfaces.

Performance Sway Bars are fully forged from hardened, high carbon steel and powder coated black for durability. Sway bars come with urethane end link and frame bushings. Brackets included for end link style attachment.

\* Or \*\* after the sell price means your order will incur an Oversize Part Charge for each oversized part. \* Means extra charge will be \$20. \*\* Means extra charge will be \$50. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.

### Urethane End Link Bushing Set

is a replacement for end link style bushings. These non-compressing bushings allow sway bars to exert maximum control and do not collapse like normal rubber bushings.

## Steering Column Drop Bracket and Floor Mount

1953-56 F100 F250 F350

Stylishly secure your new tilt column with a chrome-plated drop bracket and floor mount. Drop bracket positions the steering column for maximum driver comfort and safety. Floor mount supports the steering column as it passes through the firewall and ensures proper column function. Both are supplied with two reducing rings to accommodate all aftermarket tilt steering columns.

## Tilt Wheel Floor Shift Steering Column ... Modern Comfort for Your Classic Truck

### Steering Wheel Puller See Page 76

48-1050

Paintable steering columns are bare steel and must be painted to protect from rust.

48-1051

38-1186-F

38-1182-F

Add the convenience and reliability of a new adjustable Tilt Wheel Floor Shift Steering Column built specifically for your Ford truck. The steering column has an adjustable output shaft that can be used for manual or power steering. Column features a larger casting design, larger shafts and bearings for increased strength and stability. Improved bearing seat with thicker 16 gauge steel and a superior welded head attachment will never loosen.

These steel columns are available in a ready-paint brushed finish or show-quality chrome. All columns include self-canceling turn signals, hazard warning flasher switch, knobs, handles and wiring harness with Ford-style connections. Columns are backed by a 3-year warranty. Call or go online and order yours today!

Your original 1953-56 steering wheel will not fit this steering column. You must use one of the steering wheels listed above.

You must use Installation Kit #38-1186-F or #38-1182-F to install these new wheels on this steering column.

## Power Disc Brake Conversion Kit ... No More Front Drums

Power Disc Brake Conversion Kit contains parts needed to convert from front drum brakes while reusing existing spindles and brake pedal. 15-inch or larger wheels must be used with kit.

Brake booster mounts to stock master cylinder location and uses original brake pedal. Boosters require a minimum of 16" of vacuum and will not work with radical cams or blowers with insufficient vacuum. Measure your vacuum before ordering.

Trucks with original manual transmission will require #45-3583 Clutch Linkage Kit to retain the factory clutch pedal when converting to power disc brakes. Requires fabrication of new front brake lines.

Upper king pin grease fitting may need to be moved for clearance of the brake caliper brackets.

Kit includes power brake booster; disc brake master cylinder and combination valve; brake rotors; brake calipers and semi-metallic pads; brake caliper brackets; brake hoses; wheel bearings and seals; inner bearing adaptors; and mounting hardware.

## Disc Brake Master Cylinder Kit

Master Cylinder Kit converts your truck from a single reservoir master cylinder to a dual reservoir disc brake master cylinder. Comes with disc/drum combination valve assembly to assure proper front to rear brake pressure. For 4-wheel disc brakes, #37-8450-F combination valve will need to be purchased. Master Cylinder Kits include bracket for use with automatic transmission. For manual transmission applications, Bracket Kit #37-8462-F is required and sold separately. Mounting brackets allow you to retain the original brake pedal.

## Residual Check Valves

When the master cylinder is mounted below the brake calipers or wheel cylinders, a check valve is needed to stop the brake fluid from draining back to the master cylinder. Inline residual check valves retain a minimum brake line pressure to help eliminate excessive pedal travel without causing the brakes to drag. Disc brakes use a 2psi valve; drum brake systems use a 10psi valve.

## NotchHead Line Clamps

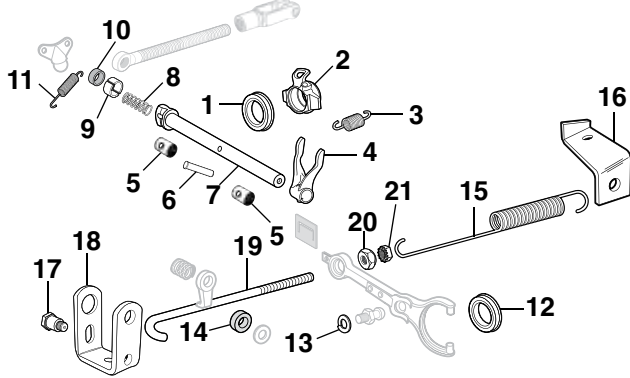

NotchHead Line Clamps organize both hard and soft lines and clamp them in place to keep from being chafed on sharp edges or crushed under moving components. Easily secure lines without marring paint. Can also be used as separators for running hoses in parallel by bolting two line clamps together. Flexible lines easily snap in for quick installation and mock-ups. Mounting hardware included in each kit.

## Wheel Bearing Grease Packer

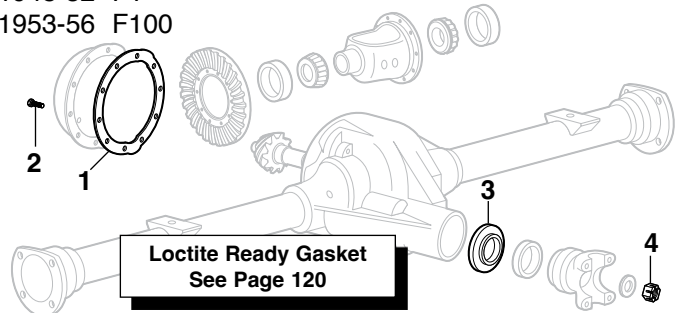

Wheel Bearing Grease Packer quickly flushes out old grease and repacks the bearings with less mess. The Wheel Bearing Grease Packer works on bearings up to 3 1/2" outer diameter. The grease stays in the tool cavity, not on your hands. To pack a bearing, simply place the bearing on the piston, press down on the cap until the old grease is forced out and the new grease shows on top of the bearing.

## How to ID a DANA-SPICER Axle

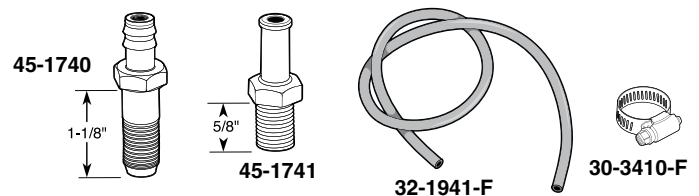

All Spicer axles are identified with a manufacturing date and Bill of Material Number stamped on the right or left hand tube. The axle model number will be cast into one of the webs as shown, or it can be on the nose.

The Bill of Material Number will always contain six digits followed by a dash number. Bill of Material Numbers are listed where necessary for axle identification. When a Bill of Material Number is listed, it means the item will only fit axles stamped with that Bill of Material Number, e.g. 610320-1.

## Accessory Drive Systems

S-Drive Pulley Systems are the most compact and easiest to install serpentine kits on the market. Change the appearance and performance of your engine with pulleys and brackets CNC-machined from high quality billet aluminum. Fits 260, 289, 302, and 351 Windsor engines. Includes billet timing cover for easy installation. The cover does not have a provision for a mechanical fuel pump (must use electric pump). Kits are designed to be used with factory 4 bolt balancers with a maximum diameter of 6.40" and a measurement from the face (pulley mounting surface) to the block of 4.70". These serpentine drives do not allow the use of push-in style front timing cover mounted dipsticks.

### Drive Systems include:

- Powermaster 170 amp alternator
- Aluminum water pump
- Sanden AC compressor
- Gates tensioner and serpentine belt
- GM Type II power steering pump
- All necessary CNC billet aluminum brackets and pulleys
- Stainless steel hardware

Power steering reservoir and hoses are not included and must be purchased separately.

## Oil Filter

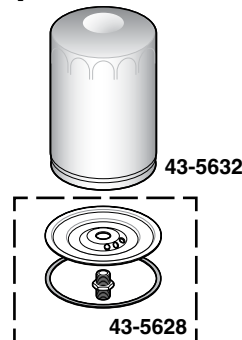

1948-52 F1 F2 F3  
1953-56 F100 F250 F350

A good oil filter will trap up to 90% of damaging dirt particles. It is recommended to change the oil and oil filter every 3,000 miles. If the oil filter is not changed at recommended intervals it could become clogged, allowing unfiltered oil to circulate throughout the engine, leading to expensive repairs. The cleaner the oil is, the cooler the engine will run.

## Carburetor Synchronizer Tool ... Makes it Easier to Do the Job Right

If dual carbs are added to an engine, the Carburetor Synchronizer Tool helps the truck run with better economy by balancing the airflow between the two carburetors giving equal airflow at all degrees of its throttle opening. By manipulating the idle adjustment screw, each carburetor can be set at the same air intake volume.

The tube, which must always remain in a vertical position, is adjustable through 150° to allow the tool to be used on almost any type of carburetor and manifold installation.

PART	DESCRIPTION	PRICE
48-0846	CARB SYNCHRONIZER TOOL	\$32.95

## NEW Holley Sniper 2 Electronic Fuel Injection System

Holley Sniper 2 EFI is a self-tuning, easy-to-install Electronic Fuel Injection conversion for common 4-barrel (4150 flange) style carburetors. Make your classic truck drive like a modern fuel-injected vehicle, including easy cold starts, smooth drivability, and improved fuel economy!

If you're looking for a high-performance fuel injection system that delivers power, efficiency, and ease of use, look no further than the Sniper 2 EFI.

- Replaces 4-barrel (4150 flange) carburetors.
- Available in black or polished finishes.
- 4 wiring connections required: Battery+, Battery-, Switched Ignition, and RPM.
- Variety of tuning and gauge display interfaces: from a 3.5-inch full color LCD Handheld, 5-inch Digital Dash, or the Bluetooth dongle, which allows you to connect either an iOS or Android based cell phone to the Sniper 2.
- Inputs and outputs consist of: 2x Ground Inputs, 2x Ground Outputs, 1x TPS Output (0-5v), and 1x Tach Output.
- Onboard contactless magnetic TPS sensor ensures an accurate TPS reading.
- The included genuine Bosch LSU 4.9 wideband oxygen sensor provides real-time fuel map learning.
- Redesigned throttle shaft and plate geometry for a smoother throttle feel.
- Supports up to 650hp naturally aspirated or 575hp on boost with four 100 lb/hr injectors.
- Next generation ECU features improved RF noise and interference resistance.
- "Hidden Harness" wiring harnesses exits from the rear of throttle body for a clean appearance.
- Redesigned injector connector for improved reliability.
- Main harness includes plug-and-play HyperSpark distributor support, for integrated timing control, making your ignition setup hassle free.
- Included clamp-on oxygen sensor kit ensures a leak free oxygen sensor installation.
- Integrated transmission kick down provisions for GM TH350/400, 200-4R/700R4 and Ford C4/C6 applications.
- Calibration wizard only requires that you answer a few simple questions about your engine to create a base map and begin self-tuning – No laptop required.

## Holley In-Tank Retrofit Fuel Modules

With over 100 years of expertise in fuel systems, Holley is unrivaled in the industry. Holley In-Tank Retrofit Fuel Modules allow you to easily convert your truck's original fuel tank into a fuel-injection compatible tank with basic tools and no complexity. The universal, return-style systems fit fuel tanks up to 12" deep, and Holley's brilliant HydraMat (included) virtually eliminates any chance of fuel starvation or poor running conditions due to air entering the fuel system. The innovative billet bracket system ensures a corrosion-free life in a low-profile design that can be rotated to fit in any position needed for your application. Available with either a 255 or 450 lph (liters per hour) fuel pump.

## Turbo Mufflers ... Reduce Noise without Restricting Power

Turbo Mufflers are specially designed to reduce and control noise without excessively restricting power. They are made from the finest quality materials and can be used as OE replacements as well as on custom exhaust systems.

36-6030-F

**Turbo Mufflers** have a galvanized, double wrapped muffler casing for maximum rust protection. Louvered baffles eliminate vibration and spun end caps provide a gas tight seal. Reverse flow design allows muffler to be inverted.

## Thermal Spark Plug Boot Sleeve Set

Thermal Spark Plug Boot Sleeves provide thermal protection against hot exhaust headers. Double-layer gray fiberglass sleeves are non-conductive and can directly contact hot surfaces without harmful effects. Chemically-resistant 3/4" diameter braided sleeves easily slip over any spark plug wire and boot configuration to protect from temperatures up to 1,200°F. Call or go online and order yours today!

PART	DESCRIPTION	PRICE
36-6190-F	SPARK PLUG BOOT SLEEVE SET	\$14.45

## Header Wrap

Increase performance by keeping hot exhaust gasses inside the headers for maximum velocity, improved exhaust scavenging and protecting sensitive engine components from high temperatures.

Header Wrap is able to withstand temperatures up to 1,200°F and is made from vermiculite-coated, textured fiberglass yarn woven into a strong, flexible wrap that can easily be cut with scissors.

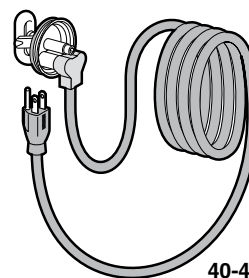

Available in 25 or 50-foot rolls of 1" or 2" widths. Two 50-foot rolls of 2" wide are generally enough to wrap standard V8 headers. Stainless steel locking cable ties keep the wrap securely in place. *Header Wrap can void warranty of some headers. Check header manufacturer's warranty before installing.*

Headers with tight bends should use 1" wide wrap for coverage. Overlap wrap 1/4" for optimum heat dissipation.

## Complete Bolt-On Performance Exhaust Systems ... Connect without Welding

1954-56 F100 F250 F350

Exhaust Exits at the Rear of the Vehicle

Performance Exhaust Systems are manufactured from 2" inner diameter 16-gauge aluminized steel that lasts up to twice as long as conventional plain steel systems. Made with modern tube benders, utilizing mandrel bends, ensuring each bend is smooth flowing increasing exhaust flow by up to 20% over stock exhaust systems. These Performance Exhaust Systems have bolt-on connectors that adapt to your stock manifold ... no welding necessary! All parts and hardware for standard installation are included. Turbo Exhaust Systems have a 2" in and out Flow Turbo Muffler to reduce back pressure and give that great low exhaust tone you expect from your truck.

## Air Conditioning Systems

1953-56 F100 F250 F350

These are complete AC, heat and defrost systems that utilize fully electronic operations. The unit is interior mounted under the dash and installs to the firewall using the supplied template. AC and heater fittings pass through a custom rubber grommet. Step-by-step, fully-detailed illustrated instructions are included.

AC systems with compressor are designed for use with Ford V8 engines. Order the corresponding mount and drive kit based on the engine in your vehicle. Mount and drive kits include compressor mounting bracket, idler pulley, adjuster, hardware and instructions. Systems supplied without compressor are ideal for vehicles that have swapped engines and/or already have installed an AC compressor as part of their engine's accessory drive system.

All systems feature a custom brushed billet electronic slide type control head that fits in the under dash mounted center vent module. Electronic servo motors control mode selection and heater valve function. All systems utilize under dash vents and are designed for use with R134A refrigerant.

## Heater Hose Fitting, Carburetor Stud Kits and Pipe Plugs

These often overlooked items are always a good idea to have on hand when working on intake, carburetors, engine plumbing, or vacuum accessories.

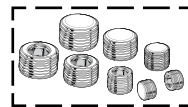

High quality Aluminum Heater Hose Fittings are available in clear or black anodized finish with straight or 90 degree bends. The threaded NPT (National Pipe Thread) fitting ensures a leak free seal and the single barbed outlet allows proper hose connection.

## Ignitor Electronic Ignition System ... Never Change Points Again !

47-2921

## 30 Month Warranty

This precisely engineered solid state breakerless ignition system installs with only two wires. The entire Ignitor System is immune to dirt, oil, heat and moisture. Firing down to zero rpms, it switches twice the energy of conventional systems. Installation is fast and simple; can be installed in the time required to change a set of points.

## Ignitor II Electronic Ignition System

47-2931

## 30 Month Warranty

Senses current level in the coil and adjusts dwell to maintain peak energy throughout the entire rpm range. Develops an average three times more available energy between 3,000 and 5,000 rpm and nearly doubles available plug voltage. High rpm performance is improved with the new Flame-Thrower II™ Coil. Peak current level is reached just prior to spark, so ignition energy is sustained with less heat build up, increasing coil and module life. Adjusts spark timing over the entire rpm range to compensate for the inherent electronic delay, resulting in more stable timing. Senses incorrectly wired or key left on and shuts down the system, protecting the coil and other components from damage.

## Crimper Tool Set

This Crimper Tool Set offers a simple way of crimping the ends in your wiring harness project. The single crimper is used for wire sizes ranging from 20 to 14 gauge and the double crimper is used for sizes from 10 to 18 gauge or terminals receiving a two wire connection.

PART	DESCRIPTION	PRICE
47-3777	CRIMPER SET LARGE-SMALL	\$229.50

## Wire Terminal Extractor Tools

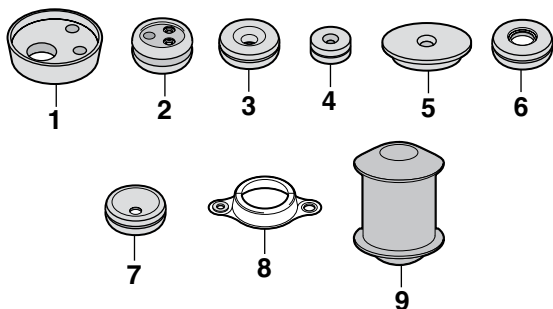

This Wire Terminal Tool Kit is designed to release and extract wires from terminals without damage. The single blades have a bevel ground onto the end for working on small terminals found on newer vehicles. Red is specially designed for Pak-Con and WeatherPak terminals. Silver has prongs to depress the 'barbs' on conventional terminals. The handle slips over the probes to protect your hand as well as provide extra leverage. This complete kit comes in a sturdy blow-molded case for protection and long life and is a must-have for any do-it-yourselfer's toolbox.

## WeatherPak Wire Extractor Tools

These WeatherPak Wire Extractor Tools will save you time and hassle when servicing your vehicle's wiring system. Tools are engineered to easily release and remove OEM terminals from their WeatherPak housings, as well as releasing the lock tab on Packard 56 and Pak-Con terminals. This 3-piece set comes with a narrow pick (.05" wide), wide pick (.09") and tubular-shaped extraction tool. Handles are color-coded for easy identification.

## Classic Braid Flex Loom

36-2615-F

Soft cloth-like 10 mil thick braided material is lightweight, flexible and retains shape and rigidity from -100°F to +250°F with a melt temperature in excess of +400°F. Features a lateral split along its entire length that closes in around the wire bundle without the need for tape or wire ties. Additional 25% edge overlap allows coverage around inline plugs, connectors and splices. Comes in 3/16", 3/8", 1/2", 3/4" or 1" diameter and sold as a 10' roll.

36-2597-F

Wire Loom Installation Tool makes feeding wires into split wire looms a snap. Insert the wiring into the channel of the tool, rotate the handle to lock wiring in place and insert the loom separator into the split loom. Gently pull the tool through the loom while holding onto the wires. Available in three convenient sizes.

## Universal Wiring Harness ... Finish the Job Right the First Time

Universal Wiring Harness from Painless Wiring is a comprehensive approach to rewiring your truck's electrical system. Factory assembled harness features a prewired fuse block with modern blade-type fuses and built-in additional circuits. Wiring Harnesses are available in 21 circuit and 28 circuit assemblies.

High quality terminals and color coded and labeled GXL/XLPE wire (cross-linked polyethylene, -60°F to 275°F abrasion resistant) are used. Includes conventional and 1-wire alternator leads. Terminals are provided to make adapting to any aftermarket steering column easier. Standard features include starter wiring, tachometer lead, single headlight plugs, third brake light, horn relay, turn signal and 4-way hazard flashers, fuses, terminal ends and wire ties. Easy-to-follow instructions and schematics are included.

47-3615

Wiring Harness is designed for 12 volt negative ground systems only. To maintain 6 volt heater order part #36-3608-F and #36-3640-F for 6 volt gauge, see below.

**Dielectric Grease**

## 16 Circuit Wiring Harness

This 16 Circuit Wiring Harness from American Autowire will rewire a truck from headlights to tail lights and allows the flexibility to add many options and accessories. Features original-style connectors to work with the original switches, but is also designed to accommodate many aftermarket products such as custom steering columns, gauges, internally regulated alternators, HEI distributors, air conditioning, electric fans and more.

Wiring harness has many features including a 16 circuit ATO-style fuse box and mounting plate for underdash installation. It features new switches including a headlight switch with an adjustable length shaft and custom knob, dimmer switch and ignition switch. Instrument cluster wiring is designed to disconnect from the main harness for easy service and installation. Separate underdash courtesy lamp assemblies are also included for use along with your original dome/interior lighting feeds. Front and rear body harnesses feature longer leads to allow for stock or custom routing of the wires. Easy-to-follow, illustrated installation manual included.

## Voltage Reducers

**#36-3608-F Ceramic Voltage Reducer:**  
Provides solution for a 6 volt heater (etc.) that must be used with a 12 volt vehicle electrical system. *Not intended for use with electrical gauges; 4 amps maximum current. More than one may be used in parallel to increase load capacity.*

36-3608-F

**#36-3640-F Electronic Voltage Reducer:**  
Enables reuse of original 6 volt fuel, oil and temperature gauges when converting a truck to a 12 volt negative ground system. Connect one reducer to each gauge and the EVR will stabilize output at 6 volts while eliminating gauge fluctuation.

36-3640-F

Note: Do not use on amp gauge. Most amp gauges will work on 12 volts with no changes required. An electronic voltage reducer will have to be purchased for each 6 volt gauge.

## Underhood Lamp

42-5503

**Installation Tip:** Since all hoods and mounting locations are different, a slight adjustment to mounting bracket may be needed to assure light goes out when hood is closed. After mounting bracket and wires have been installed, apply pressure to the mounting bracket to change the angle as needed for proper operation.

Underhood Lamp adapts to any 12 volt truck and helps illuminate the engine bay. No need for wiring into a switch, bulb socket base is gravity activated; lamp comes on when hood is raised and goes out when hood is lowered. Mount underneath hood and connect lamp wire to any constant 12 volt source. Moisture proof in-line fuse is integrated into the wire for protection.

## Custom Headlight

These OE-quality headlights feature an aluminum die-cast housing with a protective finish coating, making the housing corrosion free. Maximum light output is produced by brighter light focused on the road for a greater distance.

The strong, semi-hardened, crystal clear glass lens does not diffuse the light like traditional headlight lenses. A high-efficiency white halogen 12V 60/55 watt replaceable bulb is included. DOT and SAE approved.

#36-0299-F includes a white LED halo accent light that can be wired directly to any 12-volt circuit.

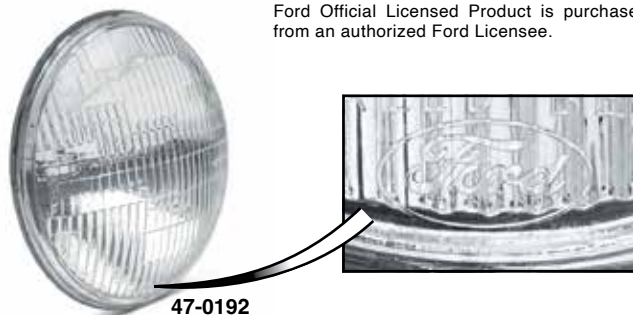

If adding brighter bulbs or upgrading to high power halogen lights, use a Heavy-Duty Headlight Harness. For more information, see below.

## Heavy-Duty Headlight Harness

36-3580-F

Heavy-Duty Headlight Harness draws power directly from the battery whereas the original wiring draws its power from the headlight switch. Harness has separate relays for low and high beams and features OE-style headlight sockets

for easy installation. No splicing or cutting required. Call or go online and order yours today!

**Fits models with 12 volt electrical systems and will also work as an upgrade for trucks that have been converted from 6 volt to 12 volt systems.**

## High-Performance Halogen Headlight

36-0304-F

High-Performance Halogen Headlights produce whiter and brighter light closer to natural daylight compared to standard halogen headlights' yellowish color. Upgraded bulbs not required. DOT and SAE approved.

## LED Headlights

LED headlights dramatically improve safety and visibility with a bright white light output for superior night-time driving. Features a cast aluminum powder-coated housing with an impact-resistant polycarbonate lens and rugged aluminum reflector. Solid state bulb-free design is resistant to damage from shock and vibration.

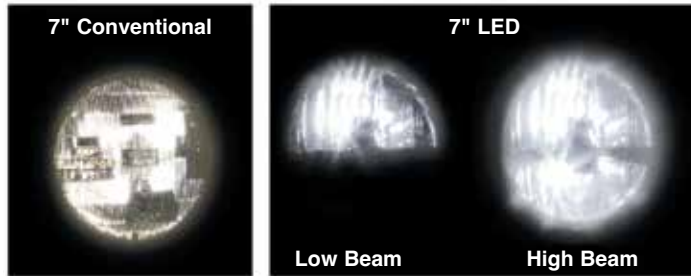

DOT approved headlight is energy efficient and lasts longer than conventional bulbs.

### Superwhite Bulb Set Produces 30% More Light

Superwhite headlight bulbs produce 30% more light while retaining the street legal wattage. Superwhite bulbs use a proprietary mixture of premium gases that includes Xenon, which cools the light filament, improving the efficiency and light output of the bulb, unlike standard halogen bulbs which use less efficient argon gas.

Superwhite bulbs operate in the Kelvin color temperature range of 4000-4200K, producing a brighter, white light. Traditional halogen bulbs operate at 2600-3000K, emitting a more yellowish appearance. Sold in sets of two. Call or go online and order yours today!

### Halogen Blue-Coated Headlight Bulbs

**Halogen Bulb Tech Tip:** Always handle halogen bulbs by the plastic base to prevent contaminants on the glass from shortening the life of the bulb.

Replace the white halogen bulbs with a halogen blue-coated bulb. Blue-coated bulb creates an intense white light, giving the cool look of HID (high intensity discharge) lighting without the high price; call or go online and order yours today!

New technology previously only on high-end luxury cars is now available for trucks! These tail light lenses with LEDs quickly alert other drivers of your intentions with LED bulbs that illuminate 140 times faster than conventional incandescent bulbs, which translates to a gain of 20+ feet of reaction distance!

### Additional LED benefits:

LEDs have no filament, which means they are less sensitive to vibrations, and they can last up to 20,000 hours. They use only 15% of the energy required by incandescent bulbs, reducing the load placed on your truck's charging system and less heat is emitted.

Tail light lenses are a direct replacement for stock lenses. Simply remove original lens and bulb, and install the LED tail lights in their place.

#47-0336 & #47-0337 feature sequential operation with sequential left, sequential right or sequential off. Also includes brake attention function that lights from the inner LEDs outward once, then all on when brakes are applied.

### What You Need to Know Before Ordering:

We are excited that you've decided to make us a part of your journey! Whether you are rebuilding from the ground up or just adding some distinctive touches to your vehicle, we are proud to give you a hand.

In addition, we'd love to see what you've been up to with your projects, so please log on to [lmctrucklife.com](http://lmctrucklife.com) and share your stories and pictures.

Understand that we are not trained automotive technicians. We want you to consult with mechanics regarding technical advice. Technical information is also included in the workshop manuals shown in this catalog. Please take the time to consult these resources if you feel you need to.

On those occasions that we've run out of a part on your order, chances are that it's already on its way to us. These items are listed as backordered on your invoice and will be sent your way as soon as possible. If you're not interested in waiting for your backordered product, just call our customer service line at (800) 222-5664, and we will cancel it and refund any money that has been paid.

You can also write "No Backorders" on your order form before you send it to us, and we'll make sure only to ship the products we currently have in stock.

Some parts have extra charges. Please consult below to make sure you understand these charges and so you aren't surprised later.

#### Part Number Definitions

- T -** After a part number means that part must be shipped Truck Freight. The prepaid order will include a \$150.00 charge for delivery in the 48 contiguous United States. Orders outside of 48 states will be quoted. Due to packing and/or transportation requirements, please allow additional time for delivery.
- \* -** After the sell price means Oversize Part Charge. Your order will incur a charge of \$20.00 for each oversized part. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.
- \*\* -** After the sell price means Oversize Part Charge. Your order will incur a charge of \$50.00 for each oversized part. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.
- R -** After a part number means Remanufactured Part. No core charge.

And one more thing, the part our lawyers make us say: We reserve the right to refuse service or shipment to anyone. We reserve the right to collect a service charge of \$20 for a returned check and to hold any shipments until the fee is collected.

Thank you for your support. Best of luck with all your projects!

### What You Need to Know Before Returning:

If only we lived in a perfect world! Unfortunately, we don't, and things can go wrong. When that happens, we do our best to try to make things right again. But we need your help as well.

All returns must be in like new condition and in the original packaging. Please include a copy of your invoice, as that will make the process quick and easy.

We refund your payment the same way you paid. Refunds of less than \$1 will not be made except by customer request.

We can't be responsible for damages, so please package your returned items carefully.

If you can ship the item back to us ground or USPS within the 48 contiguous United States, you don't need to call for authorization. Just send it to us at:

**17301 W. 113th St, Lenexa, KS 66219**

If we shipped you the wrong item, send it back, and we'll send the right item and reimburse you the ground rate for your return.

We can't accept anything that has been installed (unsuccessful attempts do count), disassembled, drilled, welded, cut, painted, or modified in any way, so please make sure to check and doublecheck the fit before starting any work.

If you are returning a kit, it needs to contain all the parts you received. No partial kits may be returned.

Electronic media (CDs, DVDs) cannot be refunded once they are opened. However, if it is not working properly, it can be exchanged for the same part number.

Please call our customer service line for a return authorization if your part was delivered outside of the 48 contiguous United States.

If you want to return something you bought over a year ago, please call our customer service line for return authorization.

You must call Customer Service when returning a Truck Freight item.

**Customer Service Line: (800) 222-5664**

**¿Habla Español? (855) 456-2288**

A 20% non-refundable restocking fee will be added to anything that's over a year old (unless the extended manufacturer warranty is still in effect, of course) as well as to any unauthorized Truck Freight returns.

And the legal part again: We have the right to refuse any return we deem unfit for resale. We also have the right to refuse any shipments where the shipping charges, duties, customs, etc., are not prepaid.

This chart shows shipping charges on orders up to \$500. Parts must be 108 inches or less and weigh 70 pounds or less to qualify. If any part does not meet these qualifications, your order will be delivered by ground for additional charges.

All orders will ship complete. Any additional delivery charges will be added to your total as needed, including Oversize Part charges or overweight charges.

We will need a daytime phone number with your order. If there is a problem with your order, we will attempt to contact you three times. If we are unsuccessful, your order will be cancelled 5 days after that third failed attempt.

### What You Need to Know When Shipping Problems Occur

Please open your package(s) as soon as possible and make certain that everything is accounted for and nothing was damaged in shipment. Damaged shipments are the responsibility of the carrier and must be reported to the carrier within 15 days of receipt.

If the package looks damaged when it arrives, open it with the delivery person present, so that they can make an immediate report of damages and discrepancies. If the damage is not obvious at the time of delivery, or if the package was left for you by the shipping company, contact their customer service as soon as possible to make your claim.

On Truck Freight shipments, it is your responsibility to check your order and have the driver note any damage on the freight bill before you sign for your item(s).

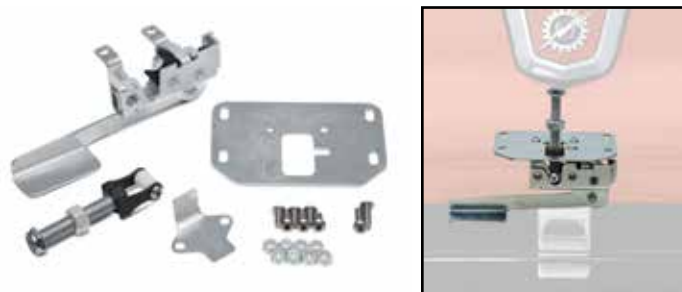

Please keep all packing, packaging and contents until your claim has been settled with the shipping company.

### What You Need to Know About Shipping Internationally

All international orders ship complete. Shipping charges must be prepaid in U.S. funds. Brokerage, duties, taxes, and fees associated with the order are paid by the customer. We do not accept personal checks on international orders.

## Altman Easy Hood Latch Kit ... Keeps Your Hood Closed

1953-56 F100 F250 F350

The Altman Easy Hood Latch Kit is the ultimate solution for closing the hood of your truck and keeping it closed.

The secure and reliable latching system requires no cutting, welding, or permanent modifications to your truck. This is a complete bolt-in kit engineered with high-quality, heavy-duty, corrosion-resistant zinc plated parts that can be left unfinished or they can be painted to match the rest of your engine bay.

The Altman Easy Hood Latch Kit is designed to last a lifetime of heavy use while closing as gently and smoothly as you'd expect from Altman Easy Latch systems.

## NEW Holley Sniper 2 Electronic Fuel Injection System

Holley Sniper 2 EFI is a self-tuning, easy-to-install Electronic Fuel Injection conversion for common 4-barrel (4150 flange) style carburetors. Make your classic truck drive like a modern fuel-injected vehicle, including easy cold starts, smooth drivability, and improved fuel economy!

If you're looking for a high-performance fuel injection system that delivers power, efficiency, and ease of use, look no further than the Sniper 2 EFI.

- Replaces 4-barrel (4150 flange) carburetors.
- Available in black or polished finishes.
- 4 wiring connections required: Battery+, Battery-, Switched Ignition, and RPM.
- Variety of tuning and gauge display interfaces: from a 3.5-inch full color LCD Handheld, 5-inch Digital Dash, or the Bluetooth dongle, which allows you to connect either an iOS or Android based cell phone to the Sniper 2.
- Inputs and outputs consist of: 2x Ground Inputs, 2x Ground Outputs, 1x TPS Output (0-5v), and 1x Tach Output.
- Onboard contactless magnetic TPS sensor ensures an accurate TPS reading.
- The included genuine Bosch LSU 4.9 wideband oxygen sensor provides real-time fuel map learning.
- Redesigned throttle shaft and plate geometry for a smoother throttle feel.
- Supports up to 650hp naturally aspirated or 575hp on boost with four 100 lb/hr injectors.
- Next generation ECU features improved RF noise and interference resistance.
- "Hidden Harness" wiring harnesses exits from the rear of throttle body for a clean appearance.
- Redesigned injector connector for improved reliability.
- Main harness includes plug-and-play HyperSpark distributor support, for integrated timing control, making your ignition setup hassle free.
- Included clamp-on oxygen sensor kit ensures a leak free oxygen sensor installation.
- Integrated transmission kick down provisions for GM TH350/400, 200-4R/700R4 and Ford C4/C6 applications.
- Calibration wizard only requires that you answer a few simple questions about your engine to create a base map and begin self-tuning – No laptop required.

## Very Happy with How it All Came Together

*Lucas Higgins and His 1955 Ford F100*

I found this truck when visiting Loretta Lynn's ranch in Tennessee, where I purchased it to use originally as yard art. I had a 1998 Ford Ranger and decided to use that as a donor to build a reliable daily-driven 1955 Ford that I could enjoy.

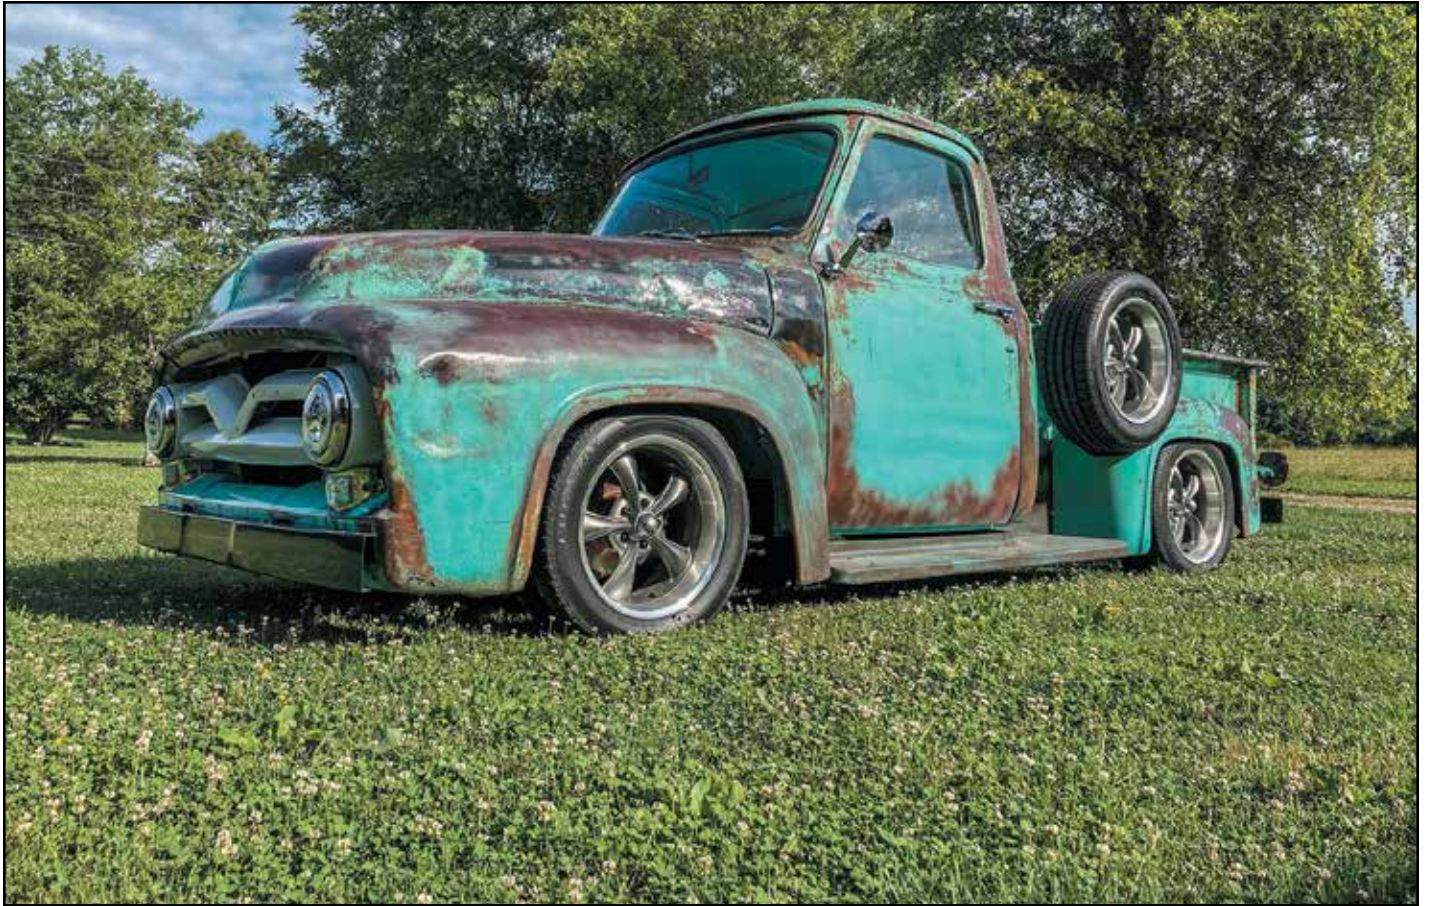

I filmed the entire build of the truck on my YouTube channel 1194VIDEO, and since then the truck has been a shop truck to help promote my car building channel and has also been featured on Gearz with host Stacey David.

I replaced all the rust with replacement panels, and all parts needed for the restoration came from LMC Truck, and I was very happy with how it all came together. It's a blast to drive and I've had a lot of fun from daily driving to enjoying car events and showing it on my YouTube channel, helping others who aspire to do the same build on their classic truck.
