PART	DESCRIPTION	PRICE
38-4519-F	HOLLEY SNIPER 2 EFI	\$1299.95

Holley Sniper 2 EFI is a self-tuning, easy-to-install Electronic Fuel Injection conversion for common 4-barrel (4150 flange) style carburetors. Make your classic truck drive like a modern fuel-injected vehicle, including easy cold starts, smooth drivability, and improved fuel economy!

If you're looking for a high-performance fuel injection system that delivers power, efficiency, and ease of use, look no further than the Sniper 2 EFI.

- Replaces 4-barrel (4150 flange) carburetors.
- Available in black or polished finishes.
- 4 wiring connections required: Battery+, Battery-, Switched Ignition, and RPM.
- Variety of tuning and gauge display interfaces: from a 3.5-inch full color LCD Handheld, 5-inch Digital Dash, or the Bluetooth dongle, which allows you to connect either an iOS or Android based cell phone to the Sniper 2.
- Inputs and outputs consist of: 2x Ground Inputs, 2x Ground Outputs, 1x TPS Output (0-5v), and 1x Tach Output.
- Onboard contactless magnetic TPS sensor ensures an accurate TPS reading.
- The included genuine Bosch LSU 4.9 wideband oxygen sensor provides real-time fuel map learning.
- Redesigned throttle shaft and plate geometry for a smoother throttle feel.
- Supports up to 650hp naturally aspirated or 575hp on boost with four 100 lb/hr injectors.
- Next generation ECU features improved RF noise and interference resistance.
- "Hidden Harness" wiring harnesses exits from the rear of throttle body for a clean appearance.
- Redesigned injector connector for improved reliability.
- Main harness includes plug-and-play HyperSpark distributor support, for integrated timing control, making your ignition setup hassle free.
- Included clamp-on oxygen sensor kit ensures a leak free oxygen sensor installation.
- Integrated transmission kick down provisions for GM TH350/400, 200-4R/700R4 and Ford C4/C6 applications.
- Calibration wizard only requires that you answer a few simple questions about your engine to create a base map and begin self-tuning - No laptop required.

I have a picture in my office. It was an aerial photograph taken in the '60s of the farm we lived on in rural Iowa. To be exact, RR1, Anamosa, IA, before every address had a house number and a private line telephone. We had a party line phone with 8 people on it, well, that is a whole letter to itself along with the Sears and Roebuck catalog, that had everything from toys to a house you could buy and build.

It was a thing back then, and still is now, that a plane flies over, takes a picture and then sells it to you. We aren't going to get into the right or wrong of that idea right now. Instead I am going to say I am grateful that day they flew over and my parents somehow had the money to buy that picture.

It hangs in my office alongside the serenity prayer. It is there to remind me of who I am and where I come from. That my mom and dad somehow raised 5 kids in a 2-bedroom house until Uncle Dewayne converted the garage to a bedroom for them in the late '60s. That you can exist without a shower and only a bathtub, that you got three TV stations if the rabbit ears were just right and wrapped in aluminum foil, and the only thing you were allowed to watch were Gunsmoke, Rawhide, and Wild Kingdom. Oh, and can't forget The Andy Williams Show. That Sunday morning was church and then grandma's fried chicken and gravy. My grandmother was younger then than I am now. I hadn't really thought about that until I started typing out this letter.

The picture is before my grandfather put the orchard in for them and the feed lot went in. It had to be the early '60s that this picture was taken. Before mom let me put in my own flower beds and I went into the woods and dug up what I wanted to plant and tried to graft or cross-pollinate. Before my mom and I had our first and only big fight over Vietnam. I was a pacifist and plant-loving, earth-loving girl, even back then, who drove her dad's old truck long before I was old enough because the sheriff would just know I was Harold's daughter.

I have been nostalgic lately. I think it is because I turn 69 in January and have outlived my parents and two of my brothers. My parents died young. My dad was only 58, so when you are older than your parents were when they died, your brain can overthink things.

At every level I know I have a great life, with two daughters with beautiful families, and I have been truly blessed. But deep in my heart I am still that young pacifist, plant-loving, earth-loving girl who just wants to garden and drive the old truck. The shorter, colder days were always my time to slow down and think about my next chapter, until COVID, and then it was just hurry and scramble and work. This year I am taking time off work to reflect and make decisions about my last chapter. I want to go into the woods, find the plants that only grow there, and try them in my wildflower garden. I want to drive the '72 Cheyenne into "town" with my grandsons to get ice cream. I will never leave LMC or sell it, but it is time for me to enjoy and spend more time with my grandchildren and daughters. Maybe only work 50 hours a week!

## 1973-79 Vehicle Identification

### Where to Find Your Vehicle Identification Number (VIN)

For 1973-1979 Fords the VIN plate is located on the rear face of the driver's door. The information on the rating plate is the VIN number, color, model type, body type, maximum gross vehicle weight in pounds, engine size and certified horsepower.

### F-Series Key Information 1973-1979

**1973:** The F-Series were redesigned in 1973 although the styling remained similar to the 1972 truck. The parking lights were moved above the headlights and the grille had rectangular slots divided by a vertical center bar. The side marker lights were located by a concave groove on the body side, which previously was a spear. The series emblem is located beneath the groove on the front fender, behind the wheel well.

**1974:** There were no exterior styling changes made on the 1974 trucks. The Super Cab was introduced.

**1975:** No exterior styling changes were made, but some interior trim and upholstery changes were made. The F150 was introduced with a GVW rating of 6,050 lb. It came with heavier springs and axles. Packages available: Custom, Ranger and Ranger XLT.

**1976:** F-Series trucks received a new grille with the familiar split grille frame. Headlights were set in blacked out bezels and rectangular grille openings were larger. At midyear amber parking light lenses were replaced with clear lenses. The F100 Flareside fitted with the pre-1972 style 6-1/2 foot box is added. Spring of 1976 this old style box was replaced by a more 90° Flareside body.

**1977:** Minor details made the 1977 truck different from the 1976 models. Side nameplates were redesigned, and the fuel filler door was now rectangular and flush with the body side. New hubcaps and wheel covers were added.

**1978-79:** New grille design was added to F-Series trucks. The split grille was replaced by a 1-piece design.

### Bronco Key Information 1978-1979

**1978-79** Beginning with the 1978 model year, Bronco was completely redesigned, bearing no relationship with the earlier models. 1978-79 Bronco is built on an F150 pickup chassis. The 1978-79 models are identical insofar as equipment goes. Engine availability was limited to a base 351 ci V8 with an optional 400 V8 also available.

## If You Can't Find the Part You Need in this Catalog, Here's What You Should Do:

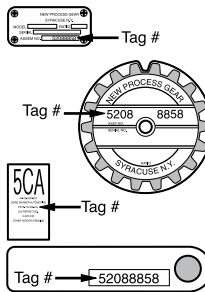

- Check local SALVAGE YARDS. Even if they do not have a truck like yours on hand, most salvage yards have access to a communication network which connects them to other salvage yards in your region of the country. Don't hesitate to ask them if you may use it.
- Check local BODY SHOPS and GARAGES for parts accumulations they may have built up over the years. You might get lucky!
- Check local WELDING and MACHINE SHOPS to see if they might be able to MAKE the part you need.

**LMC TRUCK** is in no way affiliated with the Ford Motor Company nor do we intend to imply that. The name Ford is used for reference only.

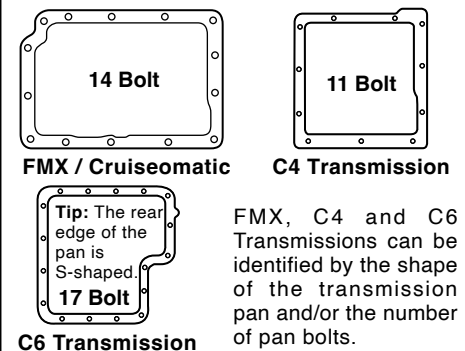

*Applications listed in this catalog are based on original factory information. However, variances will occur due to non-documented substitutions, and changes made during the vehicle's production.*

## Transfer Case ID

All Transfer Cases have an assembly tag attached to their case. The tag may be a bolted, riveted or screwed on metal tag, or a stick-on paper tag. The Transfer Case must be identified by the assembly number listed on the tag. If your tag number does not appear on the line, it will not fit your truck. See illustration.

## POR-15 Restoration Products

**POR-15** is a high-performance rust preventative black paint designed to extend the life of new and rusted metal surfaces. It dries to a rock-hard, non-porous finish that will not rust, chip, crack or peel.

Dries in 2 to 5 hours; body fillers and paint can be applied over POR-15. For maximum effectiveness, degrease metal surfaces with Cleaner Degreaser, then prime with Metal-Prep.

**Approximate product coverage:**

1 pint = 48 sq. ft.; 1 quart = 96 sq. ft.

**Dry Time Accelerator** reduces the cure time of POR-15 by 30-50% without affecting the final physical properties of the paint. One 8 ounce bottle treats 64 pints or 32 quarts of POR-15.

PART	DESCRIPTION	PRICE
37-8411-F	POR-15 SEMI-GLOSS-1 PINT	\$43.95
37-8412-F	POR-15 SEMI-GLOSS-1 QUART	\$66.95
37-8408-F	POR-15 GLOSS-1 PINT	\$41.88
37-8409-F	POR-15 GLOSS-1 QUART	\$63.89
37-8418-F	DRY TIME ACCELERATOR	\$34.05

**High Temp Paint** is an extreme temperature finish that maintains color without burning off or discoloring on manifolds and headers. Withstands high temperatures up to 1,200°F and resists cracking, chipping and peeling. It is weather-, salt- and moisture-resistant. Available in gray or aluminum color; can be brushed or sprayed on. Recommend sandblasting for optimal surface preparation.

**Approximate coverage:** 8 oz. covers a set of big block V8 headers with two coats.

PART	DESCRIPTION	PRICE
37-8484-F	HIGH TEMP PAINT-GRAY 8 OZ	\$25.51
37-8485-F	HIGH TEMP PAINT-ALUM 8 OZ	\$25.51

**Metal-Prep** provides adhesion for POR-15 on any metal surface. Gently etches metal, neutralizes rust and creates an ideal anchor for coatings such as POR-15, while leaving a zinc phosphate finish to ensure chemical bonding of paint and steel. Metal-Prep must be used on galvanized metal, aluminum, stainless steel and smooth, polished or new metal surfaces prior to applying POR-15. Metal-Prep is water-based so it is not caustic, corrosive, toxic or flammable.

PART	DESCRIPTION	PRICE
37-8415-F	METAL-PREP 1 QUART	\$22.14
37-8416-F	METAL-PREP 1 GALLON	\$44.74

**Cleaner Degreaser** cleans and degreases in one application without messy residues, noxious fumes or flammable solvents. Removes grease, oil, mildew, algae, musty odors, soap films and wax from canvas, vinyl, plastics, nylon, wood, fiberglass and all metal surfaces.

Cleaner Degreaser should be used as a surface prep prior to using Metal-Prep and POR-15.

PART	DESCRIPTION	PRICE
37-8413-F	CLEANER DEGREASER 1 QUART	\$14.67
37-8414-F	CLEANER DEGREASER 1 GALLON	\$29.95

**POR-15 Self Etch Primer** is a quick drying and easy-to-apply coating which enables a restorer to quickly topcoat POR-15 Rust Preventive Coating and other basecoats. You can even topcoat POR-15 that's been in place for months or years. This Self Etch Primer is NOT a high-build primer, it can be sprayed on almost any painted surface and can be top coated in 15 - 30 minutes. It bonds incredibly well to POR-15 Rust Preventive Coating, and all topcoats bond incredibly well to POR-15 Self Etch Primer. It can be sanded lightly, and, if desired, multiple coats may be applied.

PART	DESCRIPTION	PRICE
37-8401-F	SELF ETCH PRIMER-GRAY	\$39.15

PART	DESCRIPTION	PRICE
37-8402-F	TOP COAT-CLEAR	\$28.39
37-8403-F	TOP COAT-GLOSS BLACK	\$28.39
37-8404-F	TOP COAT-CHASSIS BLACK	\$28.39

**POR-15 Top Coat** can be applied directly to a clean prepped metal surface, but when used as a top coat over POR-15 Rust Preventive Coating it provides the toughest, most permanent protection against rust and corrosion. It has exceptional long-term gloss and color retention when exposed to sunlight and the elements, non-porous, extremely scratch and chip resistant, won't crack, peel or chip. Can be applied directly to metal substrates, with no need for a primer or undercoat, and is formulated to form a robust barrier that sheds moisture.

**Chassis Black** has a semi-gloss appearance. For maximum durability Chassis Black should be clear coated.

**Bed Liner** is a water-based, rubberized coating ideal for protecting truck beds, and all other metal, aluminum, fiberglass and wood surfaces exposed to impacts and scuffs. It is UV stable and offers superior adhesion, impact resistance and flexibility. Features a textured semi-gloss black finish for good looks. Prior to application, surfaces should be degreased with Cleaner Degreaser and metal surfaces should be treated with Metal-Prep. Bed Liner can be applied over POR-15.

Shortbed trucks - 1 gallon for two coats on bed floor, sides and tailgate. Longbed trucks need an additional quart.

**Approximate product coverage:**

1 quart = 25-30 sq. ft.; 1 gallon = 100-120 sq. ft.

PART	DESCRIPTION	PRICE
37-8480-F	BED LINER 1 QUART	\$37.94
37-8481-F	BED LINER 1 GALLON	\$142.96

**Fuel Tank Sealer** coats the inside of your tank to stop rust and seal pinholes and weld seams. It's a non-porous, flexible film that is resistant to all fuels, alcohols and fuel additives.

This environmentally safe sealer does not contain the harmful chemical Methyl Ethyl Ketone (MEK) and is non-flammable. Cleaner Degreaser and Metal-Prep must be used to prep fuel tank prior to using fuel tank sealer.

**Approximate product coverage:**

1 pint = to 12.5 gal tank; 1 quart = to 25 gal tank

PART	DESCRIPTION	PRICE
37-8488-F	FUEL TANK SEALER 1 PINT	\$31.44
37-8489-F	FUEL TANK SEALER 1 QUART	\$54.60

**POR-15 Stop Rust Kit** is designed to stop and/or prevent rust on metal surfaces and ensures the best results when applying POR-15 Rust Preventive Coating. The kit contains everything you need for the 3-step process, 8 ounce bottle of POR-15 Cleaner Degreaser, 8 ounce bottle of POR-15 Metal-Prep, 4 ounce can of POR-15 Gloss Black, two paintbrushes, 1 pair of latex gloves, and detailed instructions and tips. The kit is ideal for small projects such as sub-frames, axle replacements, control arms, brake shields and much more! There is enough material in this kit to cover a 6 sq. ft. area with two coats.

PART	DESCRIPTION	PRICE
37-8405-F	STOP RUST KIT	\$27.84

## LMC Truck Cover ... Who Knew Protecting Your Vehicle's Finish Could Be So Inexpensive!

LMC universal fit truck covers provide protection from the elements and are not affected by temperature extremes. In summer a cover keeps the interior cooler and helps protect from the sun's damaging rays, which can cause fading and deterioration. In winter it can keep the snow and ice off your glass and finish.

Fabric will not stretch, shrink, rot or mildew. Elastic is sewn in front and rear hems to ensure snug fit. Call or go online and order your truck cover today.

Antenna must be removed or an antenna grommet attached to your cover before use. See below for more information on antenna grommet.

### **LMC 1000** **\$59.95** **GOOD** each

#### For Moderate Weather Conditions

Durable synthetic fabric has the look and feel of more expensive covers. Water resistant, yet breathable and features double-stitched seams for maximum strength.

## Steel Body Panels and What to Expect

All sheet metal is inspected before it is shipped and careful steps are taken to package parts so there is no damage during shipping. Due to the nature of the product, sheet metal is easily damaged and scratches, dents, dings and other imperfections are normal and not considered damaged. These kinds of imperfections should be expected and can be easily fixed during installation and the paint preparation, sanding and priming stages of your restoration. It is recommended you inspect all sheet metal that is delivered before the delivery driver leaves. Test fitting of all panels before installation is recommended and the use of alignment shims and other adjustments during the install may be required.

Premium parts are produced using 18-gauge, OE quality steel as original for strength and durability to outperform current collision damage quality body parts. Professional EDP (Electro Deposit Primer) coating offers a smooth surface ready for prep and paint.

## Polyurethane Cab Mount Bushing Set

1973-79 F100 F150 F250 F350

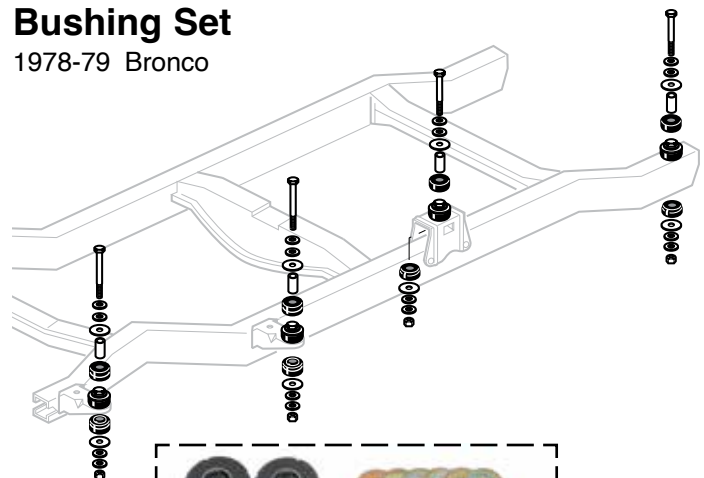

Rubber cab mount bushings have a soft and forgiving ride, but they will crush, harden and crack over time. These polyurethane bushings are specially formulated to be more durable and last much longer than rubber mounts. Order today!

## Polyurethane Body Mount Bushing Set

1978-79 Bronco

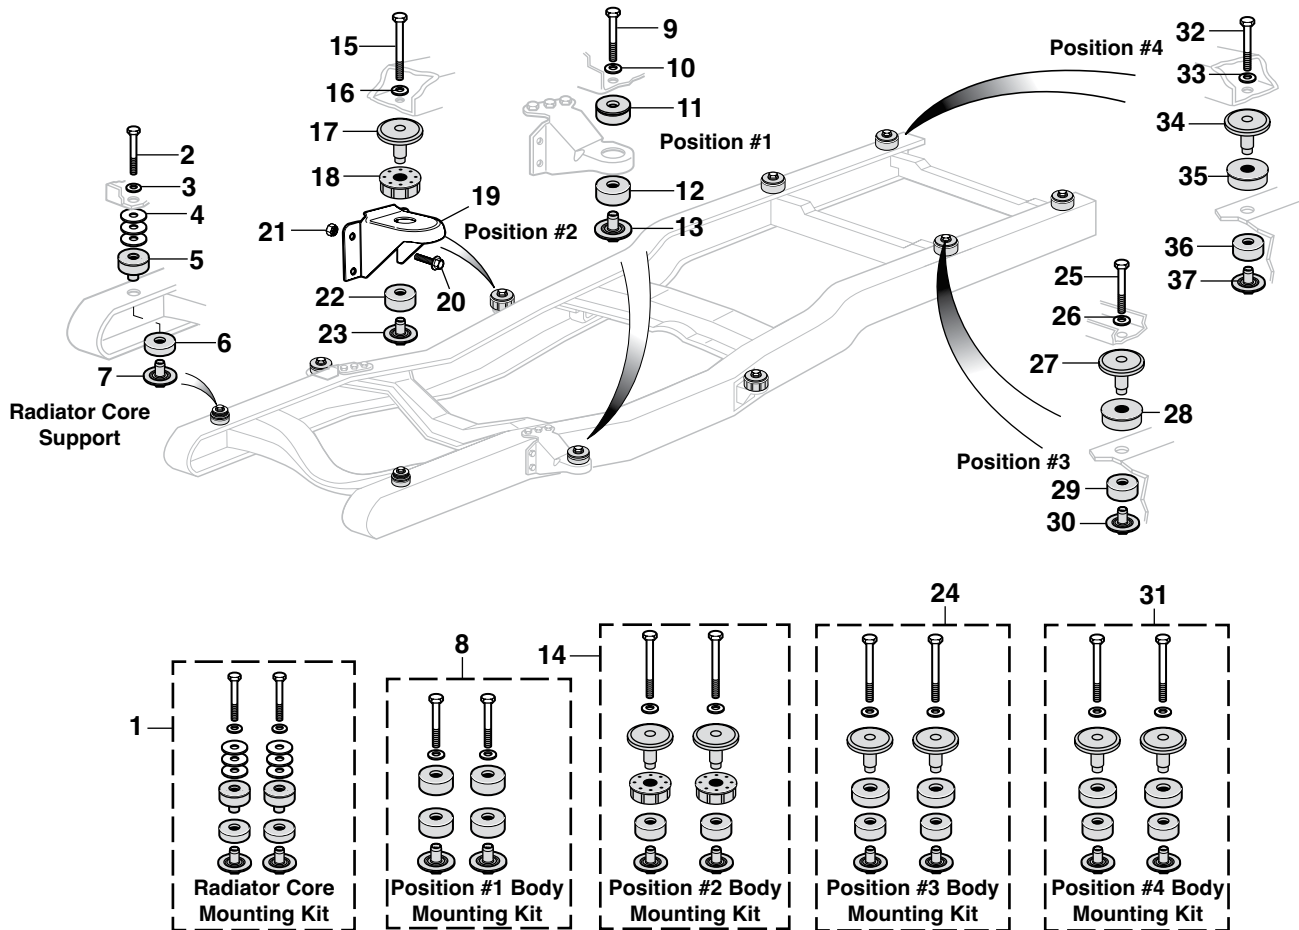

Aluminum body mounts are too harsh for street use and tend to break, while original rubber mounts are so soft they crack and crush so badly they often fall off.

These specially formulated Polyurethane Body Mounts combine the best qualities of both; they're soft enough for a smooth ride, yet rugged enough for the most demanding road. A steel ring is molded into the end for durability.

## Steel Body Panels and What to Expect

All sheet metal is inspected before it is shipped and careful steps are taken to package parts so there is no damage during shipping. Due to the nature of the product, sheet metal is easily damaged and scratches, dents, dings and other imperfections are normal and not considered damaged. These kinds of imperfections should be expected and can be easily fixed during installation and the paint preparation, sanding and priming stages of your restoration. It is recommended you inspect all sheet metal that is delivered before the delivery driver leaves. Test fitting of all panels before installation is recommended and the use of alignment shims and other adjustments during the install may be required.

-T after a part number means that part must be shipped Truck Freight. An additional \$150.00 will be charged to your order for delivery in the 48 contiguous United States. Orders outside of the 48 states will be quoted. Additional delivery time required.

\* Or \*\* after the sell price means your order will incur an Oversize Part Charge for each oversized part. \* Means extra charge will be \$20. \*\* Means extra charge will be \$50. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.

## Rail-Guards Provide Protection for Your Truck's Bed Rails

38-3202-F

38-3200-F

Rail-Guard is made of impact absorbing heavy-duty vinyl to protect your truck's bed rails. No drilling required. The full width 3M™ adhesive over the entire backside ensures maximum holding and means no condensation and dirt under the Rail-Guard. Can be used on running boards, rocker panels and in other applications where an attractive protection strip is needed.

Rail-Guard Set is a 22 foot roll of 3-3/4" wide vinyl for bedsides and tailgate with a 6 foot roll of 1" extrusion for the front bed panel. Tailgate Guard is a 6 foot roll of 3-3/4" material. Must be sized and cut to fit.

## LED Tailgate Running Light Kit ... For Added Visibility

LED Tailgate Running Lights provide added visibility to following vehicles and have a distinctive styling popular for big Dually tailgates. A good alternative location for these lights is above the rear window. Lights are a two-piece design with the lens snapping to a chrome-plated plastic body. Concealed mount screws and neoprene gasket ensure a clean, easy installation. Five light kit comes complete with wire harness and mounting hardware.

## Body Gap Filler Set

Body Gap Filler Set covers the gap between the frame and the bed of the truck. Body Gap Filler Set creates a clean backdrop for your wheels and is also used to cover the opening created by a body lift kit. Made from 3/16" thick industrial rubber, each piece measures 33-1/2" long by 4-3/4" wide and must be sized and cut to fit. Drilling is required for installation. Mounting hardware and installation instructions are included.

## Tuff Truck Bag

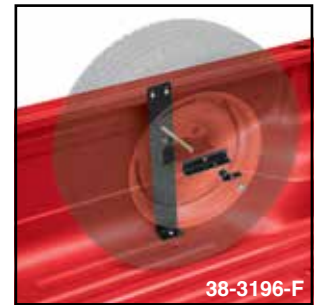

Tuff Truck Bag is heavy-duty to withstand the elements for all-season cargo protection yet lightweight and collapsible to allow for easy storage when not in use. Tuff Truck Bag can be set up and loaded into any truck bed within minutes, unlike the time required for a camper shell or tonneau cover installation.

- Made from weatherproof, waterproof, non-breathable PVC material with heat fusion epoxy sealed seams along all edges.
- Heavy-duty, commercial-grade zipper and waterproof PVC triple-fold flap that covers the zipper.
- Heavy-duty metal rings in all four bag corners (top and bottom) to retain the bag to the truck.
- Includes storage tote bag and four adjustable bungee cords.
- Provides 26 cubic feet (40"x 50"x 22") of waterproof storage for any truck bed.
- Can be used alone or in addition to existing storage boxes.

## Tailgate Mat Protects Your Truck

This rugged, virtually indestructible Tailgate Mat is made with cord-reinforced rubber for optimum tear strength and protects the truck's tailgate against dents, scratches, chemical spills and shifting loads. Tailgate Mat can be easily installed and removed. Requires minimal maintenance; cleanup is easy with soap and water.

The knobby underside promotes aeration and drainage to keep the truck's tailgate dry. A raised border around the perimeter of the mat improves appearance and definition. This is a custom molded mat with no trimming necessary. Tailgate mat includes mounting hardware.

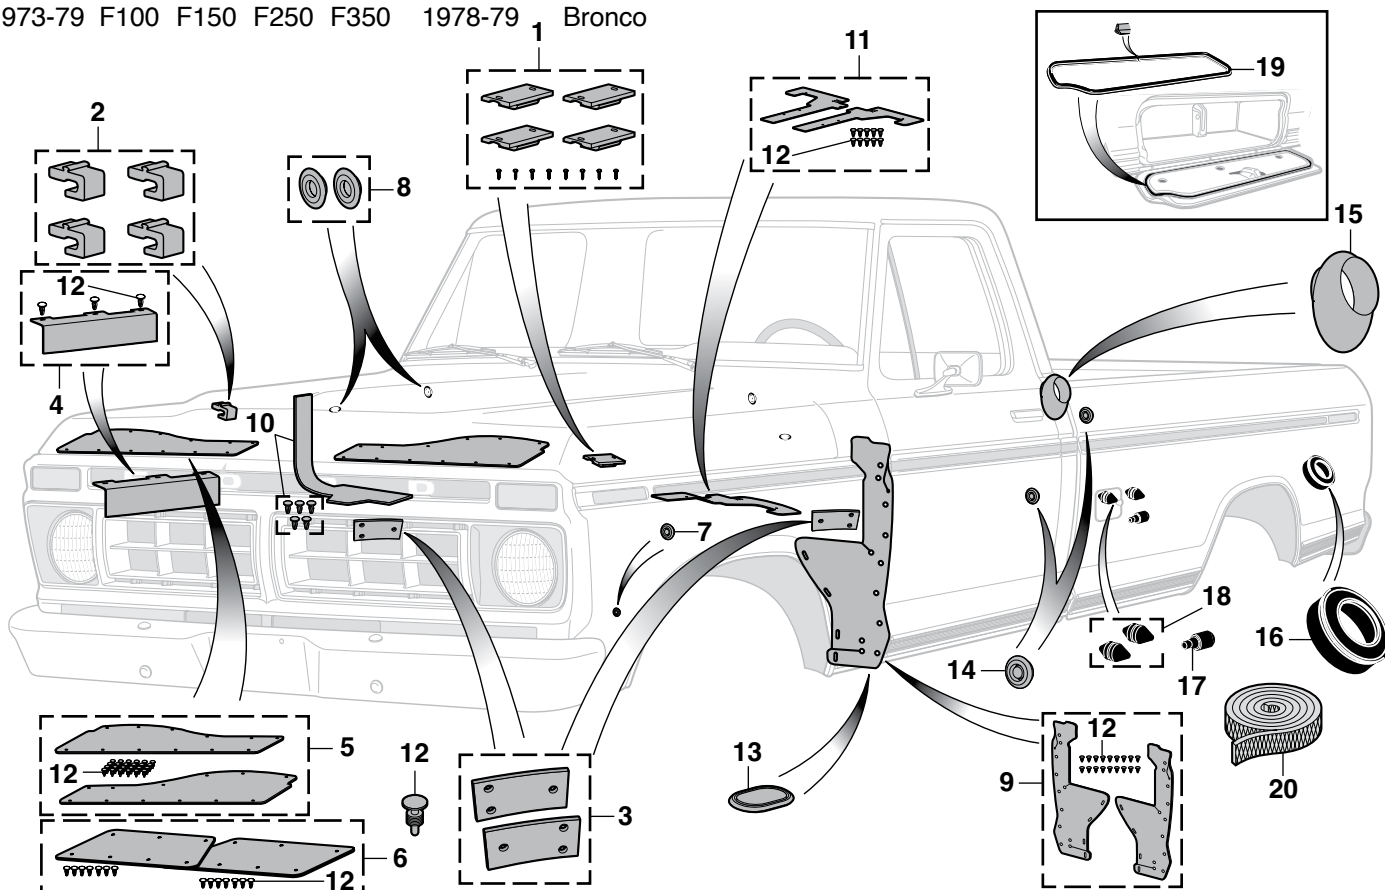

Limited Lifetime Warranty

## Chrome Grille Shells

1978-79 F100 F150 F250 F350 1978-79 Bronco

Custom Headlights and Parklights  
See Pages 162 - 167

Grille shells are available in aluminum or chrome-plated steel and are a great starting point for any restoration project! These new chrome grille shells have been buffed and polished to achieve a smooth, defect-free plating surface, well beyond what the original aluminum grille shell offered.

All 1978-79 Grille components are interchangeable. If changing round and square light bezels, matching headlight components will need to be used.

**Chrome Aluminum Grille Shell** has been stamped from new tooling and is made from OE heavy grade aluminum for strength and durability. A chrome anodized finish has been applied to achieve a high-quality, brighter than OE finish.

**Custom Chrome Steel Grille Shell** has been stamped from new tooling and is made from OE-quality steel for strength and durability. A Triple Nickel plating process gives these grille shells an exceptionally smooth surface before final chrome plating for a high-quality, mirror-like finish. 5 Year Limited Warranty on defects in material and workmanship.

## Custom Chrome Bumpers

For More Information  
on Superwhite Bulb Set  
See Page 162

Custom Front Bumpers are stamped from new tooling using OE-quality steel for strength and durability. Bumper is buffed and polished for a smooth defect-free plating surface. The Triple Nickel Plating process creates a brilliant, high-quality mirror-like finish. Bumper has a 5 Year Limited Warranty on rust-through perforations. Lights are installed in the bumper, complete with all necessary wiring and installation instructions.

Lights have an aluminum die-cast housing and three-tier protective finish coating, which makes the housing corrosion-free. State-of-the-art reflector, in combination with a strong semi-hardened crystal glass lens, gives maximum light output.

Lights use a high efficiency halogen 12V 55W replaceable bulb and are OE quality, DOT and SAE approved and are legal for on-road use. Lights come with a 3 Year Limited Warranty on assemblies (excluding bulb).

- #49-9571 Fog Light Bumper is equipped with two 3-1/8" diameter halogen fog lights.
- #49-9572 and #49-9573 combination Fog/Driving Light Bumpers are equipped with two 5-3/4" x 2" multi-surface reflector housing fog/driving lights.

Both styles include one illuminated rocker switch and one 12 volt relay.

For added style, replace the white halogen bulb with a halogen blue-coated bulb. The blue-coated bulb creates an intense white light which is popular in today's new cars and trucks. Get the cool look of HID (high intensity discharge) lighting without the high price; call or go online and order yours today!

## Tucked Rear Bumper Mounting Brackets

1973-79 F100 F150 F250 F350 Styleside

These fabricated Rear Bumper Mounting Brackets will mount your styleside truck's contoured 'Sport' bumper to the frame, tucking it roughly 3/4" closer to the body to virtually eliminate that unsightly factory gap between the bumper and rear of the bed. These sets are proudly made in the USA from heavy-duty 3/16 P&O steel and come plain, ready to paint or powdercoat and feature slotted mounting holes for maximum adjustability. Mounting hardware is available separately.

## Step up with Star-Lite

Star-Lite Bumper with Polymer Pad

Star-Lite Bumper with Diamond Tread

This Chrome Rear Star-Lite Step Bumper has a diamond tread on top for sure footing when bumper is used as a step. For more traction, #38-9737 features a step pad made from molded polymer to protect the bumper from scratches while the grid pattern adds more grip for sure footing. The internal mounted Backup Lights look great and make it safer to back up truck by illuminating a larger area, making it easier to see hazards.

Chrome Rear Step Bumpers give your truck the ability to tow up to 800 pounds tongue weight and 8,000 pounds trailer weight. These bumpers offer the ease of bolt-on installation, the convenience of a step and come complete with rear license plate lamps. Do not exceed truck manufacturer's recommended towing capacity. Bumper Mounting Kit #30-2098-F or #40-2052 is required when installing these rear bumpers.

## Replacement Backup Light

36-4416-F

Lights can be easily spliced into the existing backup light wires so they will come on each time you shift into reverse. The additional light is excellent for hooking up trailers or boats in the dark since they are located closer to the hitch area.

However, in some cases factory wiring may not transfer enough power to properly illuminate the lights. For full illumination install a Backup Light Wiring Kit (sold separately #36-0735-F).

## Backup Light Wiring Kit

Backup Wiring Kit #36-0735-F Includes:

- Illuminated rocker switch
- 30 amp relay
- 15 amp in-line fuse
- Connectors
- Wires

The wiring kit includes a separate switch, enabling you to turn the lights on and off, eliminating the need and danger of having to leave the vehicle in reverse to utilize the lights.

## Flexy-Flares™ ... To Cover Those Wide Tires

49-3716

Flexy-Flares™ provide protection from mud, dirt, gravel and salt and are a necessity in many states where wide tires must be covered by a fender. Constructed from EDPM synthetic rubber, they won't crack, peel or droop in extreme temperatures. These heavy-duty flares use a wire insert on outer edge for extra strength and added rigidity, and the built-in curvature allows the flare to fit the fenderwell without wrinkles or buckling. Flexy-Flares™ extend your fenders 3" and come with hardware packs for easy installation. **Set of 4**

## Glass Tools

38-0796-F

**Windshield Stick** A glass installer's most useful tool! Can be used to install or remove windows or window rubber. This plastic tool measures 8" in length for an easy grip.

PART	DESCRIPTION	PRICE
38-0796-F	WINDSHIELD STICK	\$ .99

38-0763-F

**Hook Tool** helps remove and install rubber mounted glass. The tool has an angled end for easier fitting of the glass inside the rubber seal. Features a round steel ball on the tip to protect against damage to the rubber seal, glass and painted surfaces.

PART	DESCRIPTION	PRICE
38-0763-F	HOOK TOOL	\$7.95

38-0762-F

**Rope-In Tool** inserts 1/4" diameter nylon rope through its stem and seats it in the groove of the seal as it is pulled around the perimeter of the seal. With the glass properly positioned on the vehicle, simply pull the rope and the seal then pops over the pinchweld to hold the glass firmly in place. Includes enough rope to fit around even the largest truck windows.

PART	DESCRIPTION	PRICE
38-0762-F	ROPE-IN TOOL	\$12.95

**Windshield Stick** A glass installer's most useful tool! Can be used to install or remove windows or window rubber. This plastic tool measures 8" in length for an easy grip.

38-0796-F

**Windshield and Glass Sealant** is silicone and seals windshields, windows, sunroofs and more. Flows into leaks like water but dries to form a flexible, tough, clear seal resistant to extreme temperatures, vibration, shock and most chemicals.

38-0783-F

## Windshield and Rear Window Installation Tips:

1. Fit your new window rubber to your cab first, then install the window glass.
2. Use a rubber friendly lubricant such as WD40 and the Windshield Stick (#38-0796-F) to ease installation and avoid damaging your window rubber.
3. Window rubber shrinks; your new window rubber may appear slightly larger than the original prior to installation.

**TINTED** Windshield has a full light green tint to glass.

**SHADED** Windshield has a full light green tint with a dark band at the top of glass.

## Molded Carpet ... Fits and Looks Like Original

1973-79 F100 F150 F250 F350

Cut pile carpet is a pre-molded shape that fits and looks like original. It's made from 100% nylon. The heavy 36 ounce jute padding under the front passenger area helps insulate against heat and reduces road noise.

Color coordinated original style heel pad is attached and an easy-to-install dimmer switch grommet is also included. The color coordinated vinyl binding helps prevent fraying and adds the finishing touch.

Shiftrod and Steering Column Holes are Not Pre-cut

**IMPORTANT:** Before choosing a floor covering, check the floor pan configuration of your vehicle. Was your vehicle originally equipped with an Automatic (Low Hump) or Manual (High Hump) transmission? Selecting the correct floor pan configuration is an important part of ensuring that your floor covering fits properly.

## Molded Carpet ... Fits and Looks Like Original

1978-79 Bronco

Color coordinated original style heel pad is attached and an easy-to-install dimmer switch grommet is also included. Color coordinated vinyl binding is used on exposed edges. This helps prevent fraying and adds the finishing touch.

The heavy 36 ounce jute padding under the front passenger area helps insulate against heat and reduce road noise.

**Complete Carpet Set** includes carpet for the passenger area, cargo area and 2 wheel wells. Tailgate Carpet must be purchased separately.

**Tailgate Carpet** covers the inside panel of the tailgate. Color coordinated vinyl binding is used on exposed edges. 1978-79 Tailgate Carpet also includes 1/8" thick Ethyl Vinyl Acetate (EVA) backing that holds shape better and deadens sound.

Molded Carpets and Tailgate Carpet are made from 100% Nylon cut pile.

## 1/8" Thick Molded Industrial Polyvinyl (MIP) Floor Mats

Heavy-duty Molded Industrial Polyvinyl (MIP) Floor Mats are made of durable 1/8" thick industrial Polyvinyl and are resistant to moisture and temperature; therefore, they will not dry rot or crack and last longer than rubber. They are vacuum molded from the original floor pan to cover the entire floor, making installation easy.

Mats are easy to clean and protect your interior from water, snow, mud and most chemicals. The MIP Floor Mat includes pre-cut 36 ounce jute padding under the passenger areas to provide a higher level of insulation against heat, cold and road noise.

**Installation Tip:** Allow mats to lay unfolded for 48 hours at room temperature of 72° or more to help remove creases caused by packing. Test fit prior to making any permanent installations (some trimming may be necessary).

All MIP Mats are only available in black.

## Pre-Cut Insulation Kit

1978-79 Bronco

49-5217

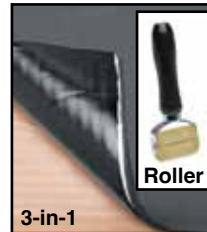

38-2816-F

Reduce noise and heat transfer inside your truck with a Pre-Cut Insulation Kit. Each panel has been cut to fit a specific location and a self-adhesive backing allows for fast and easy installation. Lightweight panels are foil over foam that vary between 2mm and 5mm thick. Pre-cut kits include thermal acoustic panels for the floor, doors, roof, and cargo area. A 2" wide roller, sold separately, helps ensure full adhesion.

## Sound Control Mat

**Sound Control Mat** reduces noise, vibration and heat created from the engine, road and structure of your vehicle. Can be applied to any interior surface area; cover as little as 25% of an area for a noticeable reduction. Each 2mm thick sheet consists of butyl rubber with a top layer of heat resistant aluminum that is easy to cut and conform to contoured surfaces, just peel and stick. Available in silver and black, each sheet measures 21" x 29".

**3-in-1 Sound Control Mat** combines the vibration absorption and heat resistant capabilities of the 2mm thick Sound Control Mat with an additional 5mm thick layer of foam for more efficient sound deadening. This makes it our most effective product for eliminating road noise and vibrations in your truck. Each sheet is 7mm thick and measures 19" x 31".

## Speedometer Cables

1973-79 F100 F150 F250 F350  
1978-79 Bronco

**Speedometer Cable Note:** Due to the number of different speedometer cables Ford used, it is necessary for you to measure your cable to select the correct replacement. If the replacement cable is longer, take a less direct route to your connections, keeping the cable away from hot exhaust and moving parts. Do not kink the cable during installation. Be sure to compare the end lower fittings of the cable you are replacing with the ones shown.

## New Vintage USA Gauge Clusters

Period-styled and themed gauges for your truck. New Vintage USA gauge clusters easily interface with original engines as well as high-tech late-model engines, ignition systems, PCMs and speed sensors including GPS. High-tech mini-OLED displays give additional information with easy to read menus, set-up and programming features. Gauges have built-in performance timers, speed warnings and shift alert. Accepts additional auxiliary inputs without requiring separate modules. All parts are direct fit designs that fit the stock gauge mounting locations without any cutting or modification required. Made in Detroit, Michigan and backed by a 5-year warranty.

### Each gauge cluster contains:

- Programmable speedometer (0-140 mph) with trip meter, hour meter and standard odometer.
- Tachometer (0-8,000 rpm for gas and 0-4,000 rpm for diesel), fuel, oil pressure, coolant temperature and voltmeter gauges.
- Sending units for oil pressure and coolant temperature.
- LED indicators for turn signals, check engine, high beam and a warning lamp. Glow plug indicator included on diesel tachometers.
- Easy-to-follow, detailed installation instructions are included.

## Classic Instruments Gauge Clusters

OE style Gauge Clusters from Classic Instruments are an all-electric cluster featuring a speedometer, fuel, oil, temperature, and volt gauges in either black or white. They feature green turn signal indicators, a blue high beam indicator, and two red warning lights. Classic Instruments' Hybrid LED Lighting offers the feel of the original lighting and the visual benefits of back-lighting: even illumination and clear nighttime readability. The clusters also have a built-in dimmer and separate power (12V) and ground leads in the wire harness for the warning lights. Gauge clusters are wired with a single snap-in wire harness on the back.

Mounting hardware is included to install with the original bezel and lens, and setup is a breeze with push-button speedometer calibration. The fuel gauge is programmable for any ohm range with a selector switch on the back of the cluster, meaning the fuel gauge will work with the stock sending unit, any other factory sending units, or any Classic Instruments fuel sending unit. Save space with Classic Instruments' Zeus Speedometer Technology built-in, meaning the cluster requires no external control boxes and works directly with ECM or VSS signals, and it has a built-in ECM signal filter switch.

## Dakota Digital RTX Gauge Clusters

RTX Gauge Clusters are focused on retaining the stock look without sacrificing late-model features. Every effort has been made to incorporate OEM design elements regarding the layout, face styling and indicators. A casual glance may dismiss these as original equipment, but once you turn the key and the LED backlighting comes on in your favorite color scheme, all doubts will be removed. A hidden rocker switch provides quick access to all settings and functions.

The digital message center can be configured to display just about any piece of information needed. Over 30 user-selectable LED color options are available with 12 factory preset color themes. Fully lit color needles, back-lighted color faces and a full color message center are dimmable for driving at night. Each analog gauge sweep (except speedometer) contains a red LED indicator for quick indication of a warning condition. Gauge clusters can also be completely configured through Bluetooth with Dakota Digital's Android and Apple free mobile app.

Includes water temp, oil pressure, and speed sensors. Existing fuel sending unit can be used. Detailed installation instructions and operation manual included. Optional expansion accessories add functionality and allow additional gauge readings to be displayed.

## Highliner with Built-In Speakers ... For a Stereo System Above the Rest

Highliner uses four built-in, uniquely placed speakers which guarantee true stereo separation as well as less distortion and ensures clarity at lower volume levels by neutralizing the echo effect found in most pickups. Radio console is designed to accept optional aftermarket stereo cassette players, CD players or CB radios.

Highliner is manufactured from high-impact, leather-grained, black ABS plastic and can be painted to match the color of the interior. It installs easily and includes four 4" air suspension speakers with a 5.8 ounce magnet, which handles up to 10 watts of power. Features high-temperature resistant voice coils and comes with foam speaker baffle and suppression pads, antenna extension cable, bezel plate, installation hardware and instructions.

## Fuel Pump Control Module

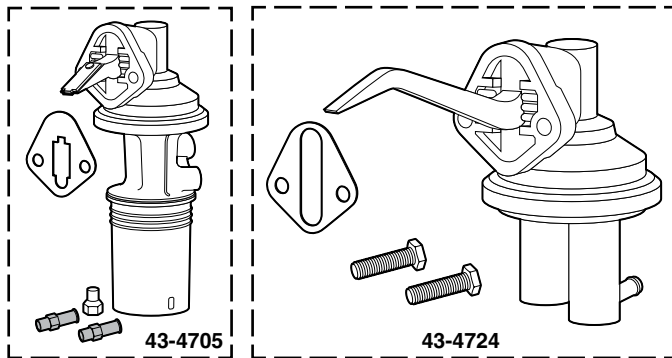

36-0906-F

Updating your truck to an electric fuel pump? Wiring the pump to an on-off switch or to a simple ignition switched source isn't the best idea. If an accident occurs, your pump would run as long as the switch is active. With the Fuel Pump Control Module, when the key is turned, the fuel pump turns on to prime the system in a three-second cycle, just like modern vehicles. Then the module uses the tach signal so the pump only runs when engine is running, giving you quicker start-ups and improved operating safety.

Fuel filters prevent dirt and moisture from entering the carburetor and blocking the tiny passages that could most hinder an engine's performance. A clogged fuel filter will cause the same problems as a faulty fuel pump: starting problems, stalling, backfiring and rough idling.

Improve the handling ability and cornering traction of your vehicle with a Performance Sway Bar. Too much weight transfer in a corner destroys a vehicle's road-holding ability, causing the wheels to "drift" or "creep" sideways in the turn, resulting in poor handling and excessive tire wear. Sway bars give your vehicle the balance and stability it needs in curves, passing situations and uneven surfaces.

Performance Sway Bars are fully forged from hardened, high carbon steel and powder coated black for durability. Sway bars come with urethane end link and frame bushings. Brackets included for end link style attachment.

34-0120-F

**Urethane End Link Bushing Set** is a replacement for end link style bushings. These non-compressing bushings allow sway bars to exert maximum control and do not collapse like normal rubber bushings.

## Performance Polyurethane Bushing Set

1973-79 F100 F150

Polyurethane Bushings allow your suspension to travel throughout its full range without binding, yet are firm to maintain proper alignment.

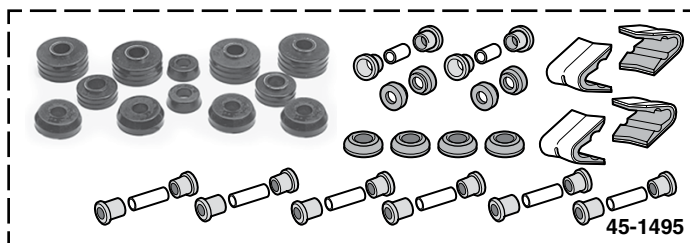

- Offset C-Bushings have maximum tensile strength for stock and altered suspension available in 2° and 4° positive caster. Recommended usage for C-Bushings is 2° offset for stock to 2" lift and 4° offset for 2" to 4" lift.
- Radius Arm Bushings allow your suspension to travel throughout its full range without binding, yet are firm enough to maintain proper alignment.
- Track Arm Bushings are manufactured for a specific job. They prevent rear end from switching left to right unannounced. Order yours today.
- The combination of heavy-duty Leaf Springs and Polyurethane Spring Bushings allows the rest of your suspension to function properly and give you that positive feeling on take off, cornering, braking and bumps.
- Cab Mounts are soft, yet rugged with a steel ring molded into the end for durability.

The F100 F150 1973-79 Polyurethane Bushing Set includes:

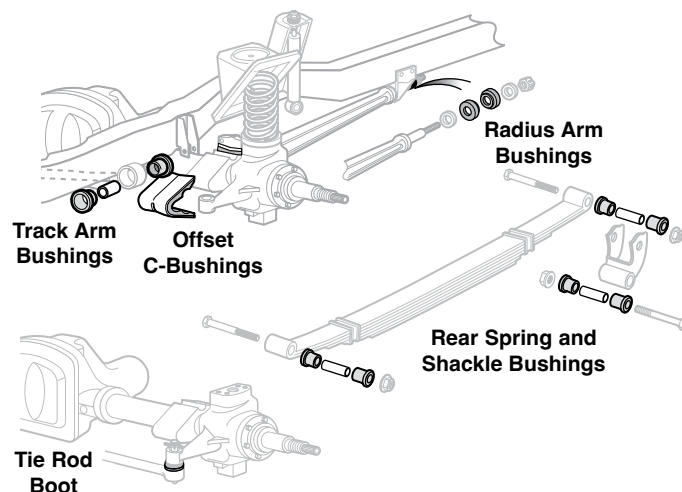

C-Bushings, Radius Arm Bushings, Track Arm Bushings, Rear Spring and Shackle Bushings, Body Mounts and Tie Rod End Boots.

### Gas-A-Just Shock Absorbers

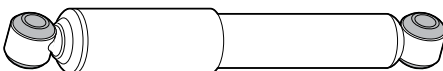

You can depend on Gas-A-Just for unsurpassed control. KYB Gas-A-Just Shocks are America's best selling monotube gas shocks. They feature higher gas pressure to keep your truck's tires glued to the road surface. They provide unsurpassed control on even the most demanding roads. Monotube design and high pressure eliminate the age old problem of performance fade by eliminating aeration and foaming, a problem with other shocks that use two-tube construction that allows air to mix with fluid.

### GR-2 Gas Shock Absorbers

The KYB GR-2 Shock Absorbers give you a satin ride at an economical price. They feature lower pressure for riding comfort, along with improved handling and response only gas shocks can provide. The GR-2 Gas Shock Absorber is the economical way to step up from hydraulic shocks to the quality ride and control of gas.

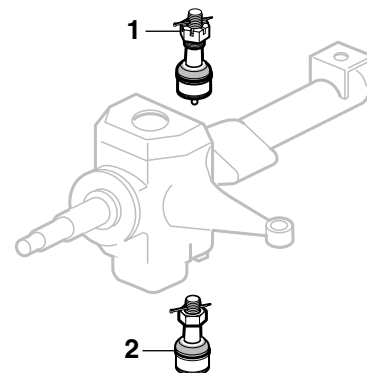

## Heavy-Duty Gas-Charged Shocks

Heavy-Duty (HD) Gas-Charged Shocks limit unsafe roll or sway when cornering and regain control of spring and suspension movement.

## How to Lower Your Truck

Factory Truck Stance

Drop is based on original factory ride height as measured from the top of the wheel arch to the ground. Original ride height is approximately 2" higher in the rear. The stance (difference in height between the front and the rear) is not affected when you lower the front and rear an equal amount. To make your truck look level you need to lower the rear approximately 2" more than the front.

-3" front

-4" rear

Use Drop Beams to lower the front and Hangers and Shackles in the rear for a cool 3 3/4" drop. Drop Shocks are required.

## Drop Chart

Use this chart to order the parts you need for the desired drop.

Year	Front/Rear Drop	Drop Beams	Hangers & Shackles	Front Shock	Rear Shock

## Drop Shocks

45-2680

These shocks are engineered to work with the lowering components listed. They feature high-pressure nitrogen gas and include a lifetime warranty. Drop Shocks are required when you lower your truck.

## Drop Beam Set

45-2635

Drop Beam Set has a unique tubular beam design which makes it the easiest and most accurate available to lower a truck. Beams are made from 1/4" minimum thickness heat-treated steel with a powder coated finish. Beams include performance urethane suspension bushings. Installation is simple; just remove factory beams and replace with the Drop Beam Set. New king pins should be installed with Drop Beams, see page 90.

## Hanger and Shackle Set

45-2651

The Rear Hanger and Shackle Set is the simplest way to lower the rear of your truck. The set includes hangers and shackles for the leaf springs to drop the rear of your truck.

PART	DESCRIPTION	APPLICATION	REQD	PRICE
45-2651	REAR HANGER & SHACKLE SET-4"	2WD F100 73-79	(1)	\$289.95

A Body Lift spaces the body away from the frame to make room for larger tires without altering the suspension. Body Lift Kit includes reinforced nylon spacers, compression tested to 50,000 psi and plated grade 5 hardware.

Since the stock suspension is not affected, and larger tires are normally part of the plan, new shocks are recommended.

**Read This:** Installation of a body lift will change the center of gravity and the handling characteristics of the vehicle. Because of the higher center of gravity and larger tires, the vehicle will handle and react differently both on and off road. You must drive it safely! Extreme care must be taken to prevent vehicle rollover or loss of control, which could result in serious injury or death. Avoid sudden sharp turns or abrupt maneuvers and always make sure all vehicle occupants have their seat belts fastened.

## Tilt Wheel Floor Shift Steering Column ... Modern Comfort for Your Classic Truck

1973-79 F100 F150 F250 F350  
1978-79 Bronco

Paintable steering columns are bare steel and must be painted to protect from rust.

Add the convenience and reliability of a new adjustable Tilt Wheel Floor Shift Steering Column built specifically for your Ford truck. The steering column has an adjustable output shaft that can be used for manual or power steering. Column features a larger casting design, larger shafts and bearings for increased strength and stability. Improved bearing seat with thicker 16 gauge steel and a superior welded head attachment will never loosen.

These steel columns are available in a ready-paint brushed finish or show-quality chrome. All columns include self-canceling turn signals, hazard warning flasher switch, knobs, handles and wiring harness with Ford-style connections. Columns are backed by a 3-year warranty. Call or go online and order yours today!

Original and replacement 1973-79 steering wheels will fit this steering column. You also have the option of using a new steering wheel and installation kit listed on page 99.

## Heavy-Duty Steering Shaft Assemblies

1973-79 F100 F150 F250 F350 4 Wheel Drive  
1978-79 Bronco

Heavy-Duty Steering Shaft Assemblies are made from chrome moly steel billets and incorporate needle bearings for precise road handling. The universal joint uses sealed, permanently lubricated needle bearings making it maintenance free. This Assembly adds a measure of safety to the steering system with needle bearing U-joints and a telescoping shaft. If there is play in the steering system, your truck will have loose and vague steering. You may feel a looseness when you hit a bump or truck may wander in crosswinds. Order yours today!

Proudly made in the USA and carries a Five-Year/50,000 Mile Warranty (whichever comes first) against defects in materials and workmanship.

## In-Line Power Steering Filter Helps Prevent Power Steering Failure

Power Steering Filter is a serviceable magnetic filter element that helps prevent contamination from dangerous metal particles and installs easily in the return hose of the power steering pump. Measures 1-1/4" diameter x 3" long and fits power steering return hoses with a 3/8" inner diameter. Check yours before ordering. Includes hose clamps and instructions.

### How to I.D. Your 1973-79 Power Steering System:

**1973-79 Integral System:** Power steering pump is connected to the steering gear by two hoses.

**1973-77 Linkage System:** Power steering pump hoses connect to the control valve, not the steering gear.

## Steering Controls - 4 Wheel Drive

1973-75 F100 (with Power Steering)

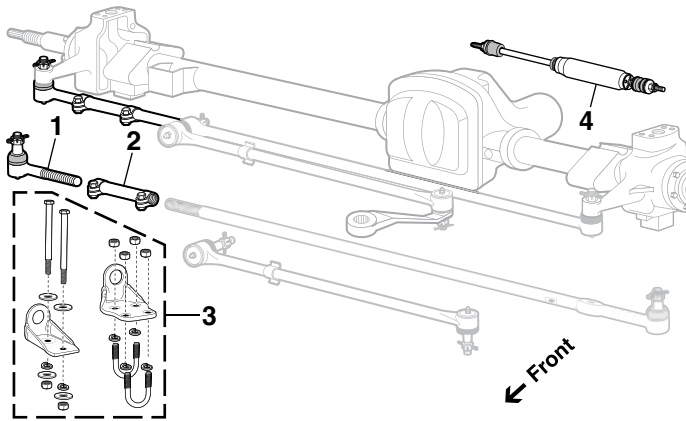

A Steering Stabilizer Kit is basically a horizontal shock absorber that helps to stabilize the steering system. The kit not only helps to stabilize the steering, but can also help in the prevention of "Bump Steer", when the steering wheel jerks suddenly as a result of hitting a pothole or object in your path. These kits will also help to reduce normal wear on vital suspension pieces, and make tires last longer. This kit is especially helpful for trucks whose original equipment tires have been replaced by larger or wider ones.

## Ford 9" Rear Disc Brake Conversion Kit

1973-79 F100 F150

1978-79 Bronco

45-3605

Rear Disc Brake Conversion Kit converts rear drums to 11-5/8" rotors with single piston calipers equipped with integrated emergency brake. Simply reuse your existing emergency brake cables. Rear disc brakes improve your truck's braking system and provide reliable, all-weather performance. Kits are available with either standard or cross drilled/slotted rotors for better performance, longer life and cooler braking temperatures.

Fits models with Ford 9" rear end only. Rear Disc Brake Conversion Kit will work with 15" or larger wheels. Disc Brake Combination Valve #37-8546-F is required. Requires fabrication of new rear brake lines.

## NotchHead Line Clamps

NotchHead Line Clamps organize both hard and soft lines and clamp them in place to keep from being chafed on sharp edges or crushed under moving components. Easily secure lines without marring paint. Can also be used as separators for running hoses in parallel by bolting two line clamps together. Flexible lines easily snap in for quick installation and mock-ups. Mounting hardware included in each kit.

## Wheel Bearing Grease Packer

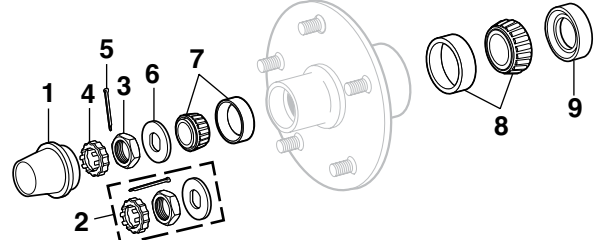

Wheel Bearing Grease Packer quickly flushes out old grease and repacks the bearings with less the mess. The Wheel Bearing Grease Packer works on bearings up to 3 1/2" outer diameter. The grease stays in the tool cavity, not on your hands. To pack a bearing, simply place the bearing on the piston, press down on the cap until the old grease is forced out and the new grease shows on top of the bearing.

## Front Differential - DANA 44 - 10 Bolt with 8-1/2" Ring Gear and 26 Spline Pinion

1973-79 F100 F150 F250

## How to ID a DANA-SPICER Axle

All Spicer axles are identified with a manufacturing date and Bill of Material Number stamped on the right or left hand tube. The axle model number will be cast into one of the webs as shown or it can be on the nose.

The Bill of Material Number will always contain six digits followed by a dash number. Bill of Material Numbers are listed where necessary for axle identification. When a Bill of Material Number is listed, it means the item will only fit axles stamped with that Bill of Material Number, e.g. 610320-1.

## Full-Time to Part-Time 4-Wheel Drive Conversion Kit

Locking Hubs Required  
 See Left

This 4x2 Conversion Kit converts a New Process 203 full-time transfer case to part-time operation. Benefits include reduced front driveline wear, better gas mileage, improved on-road driveability and decreased turning radius. Once installed, the kit provides for low and high range operations in both 2WD and 4WD modes. To ensure proper lubrication of the transfer case, it is recommended the vehicle be driven in 4WD mode for a few miles each week. Installation instructions included. Requires use of locking hub set, sold separately; see above left.

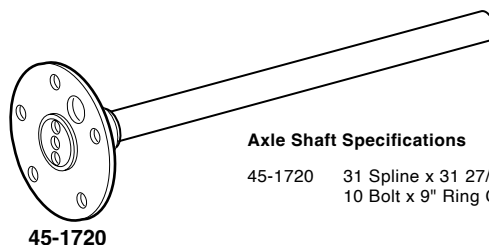

A Full-Time to Part-Time Conversion Kit enables the transfer case to operate in the following modes: 4 Lo, 2 Lo, Neutral, 2 Hi (Normal Street Use) and 4 Hi.

### Switch-Ball™ Set

37-7433-F

**Switch-Ball™ Set** - Constructed from premium grade steel with nickel-chrome plating, the Switch-Ball™ Set has an exclusive 'J' Groove design that ensures that the ball is installed on the shank and engaged by a coupler, making the hitching system safe and secure. Weight bearing capacity rests on shank to relieve stress away from the ball, thus freeing the coupler from friction and binding for a smoother and safer towing.

Change between three different trailer hitch ball sizes quickly and easily. No attachment pin to remove or tools required to switch ball sizes. Weight ratings for each hitch ball size are: 1-7/8" = 3,500 lbs., 2" = 6,000 lbs. and 2-5/16" = 8,000 lbs.

## Edelbrock Performer Series Carburetor

Edelbrock Fuel Lines

38-4440-F

38-4449-F

38-4451-F

Bolts on and performs right out of the box - a direct replacement for stock 4-barrel carburetors. Calibrated to match Edelbrock Manifolds and others of similar design for a no-hassle combination.

These dependable carbs are made of durable components with no plastic parts or power valves to blow. Their two-piece design with no gaskets below the fuel level means no leaks and easy adjustments without taking the carb off of the motor.

Comes with installation kit and instructions. Includes both timed and full vacuum ports for ignition advance.

**#38-4440-F** - 600 CFM Electric Choke with square flange -

Includes timed vacuum ports, EGR and fuel vapor outlet. Metering Jets: Primary .098, Secondary .095; Metering Rods: .073 x .047. Step-up Spring: Orange (5" Hg)

The Fuel Line and Filter Kit designed for Edelbrock Performer carbs includes a chromed hard steel line and Russell fuel filter. The Chromed Steel Fuel Line comes with a 3/8" barbed end and no filter.

## Accessory Drive Systems

S-Drive Pulley Systems are the most compact and easiest to install serpentine kits on the market. Change the appearance and performance of your engine with pulleys and brackets CNC-machined from high quality billet aluminum. Fits 260, 289, 302, and 351 Windsor engines. Includes billet timing cover for easy installation. The cover does not have a provision for a mechanical fuel pump (must use electric pump). Kits are designed to be used with factory 4 bolt balancers with a maximum diameter of 6.40" and a measurement from the face (pulley mounting surface) to the block of 4.70". These serpentine drives do not allow the use of push-in style front timing cover mounted dipsticks.

### Drive Systems include:

- Powermaster 170 amp alternator
- Aluminum water pump
- Sanden AC compressor
- Gates tensioner and serpentine belt
- GM Type II power steering pump
- All necessary CNC billet aluminum brackets and pulleys
- Stainless steel hardware

Power steering reservoir and hoses are not included and must be purchased separately.

## NEW Holley Sniper 2 Electronic Fuel Injection System

Holley Sniper 2 EFI is a self-tuning, easy-to-install Electronic Fuel Injection conversion for common 4-barrel (4150 flange) style carburetors. Make your classic truck drive like a modern fuel-injected vehicle, including easy cold starts, smooth drivability, and improved fuel economy!

If you're looking for a high-performance fuel injection system that delivers power, efficiency, and ease of use, look no further than the Sniper 2 EFI.

- Replaces 4-barrel (4150 flange) carburetors.
- Available in black or polished finishes.
- 4 wiring connections required: Battery+, Battery-, Switched Ignition, and RPM.
- Variety of tuning and gauge display interfaces: from a 3.5-inch full color LCD Handheld, 5-inch Digital Dash, or the Bluetooth dongle, which allows you to connect either an iOS or Android based cell phone to the Sniper 2.
- Inputs and outputs consist of: 2x Ground Inputs, 2x Ground Outputs, 1x TPS Output (0-5v), and 1x Tach Output.
- Onboard contactless magnetic TPS sensor ensures an accurate TPS reading.
- The included genuine Bosch LSU 4.9 wideband oxygen sensor provides real-time fuel map learning.
- Redesigned throttle shaft and plate geometry for a smoother throttle feel.
- Supports up to 650hp naturally aspirated or 575hp on boost with four 100 lb/hr injectors.
- Next generation ECU features improved RF noise and interference resistance.
- "Hidden Harness" wiring harnesses exits from the rear of throttle body for a clean appearance.
- Redesigned injector connector for improved reliability.
- Main harness includes plug-and-play HyperSpark distributor support, for integrated timing control, making your ignition setup hassle free.
- Included clamp-on oxygen sensor kit ensures a leak free oxygen sensor installation.
- Integrated transmission kick down provisions for GM TH350/400, 200-4R/700R4 and Ford C4/C6 applications.
- Calibration wizard only requires that you answer a few simple questions about your engine to create a base map and begin self-tuning – No laptop required.

## Oil Filter

1973-79 F100 F150 F250 F350  
1978-79 Bronco

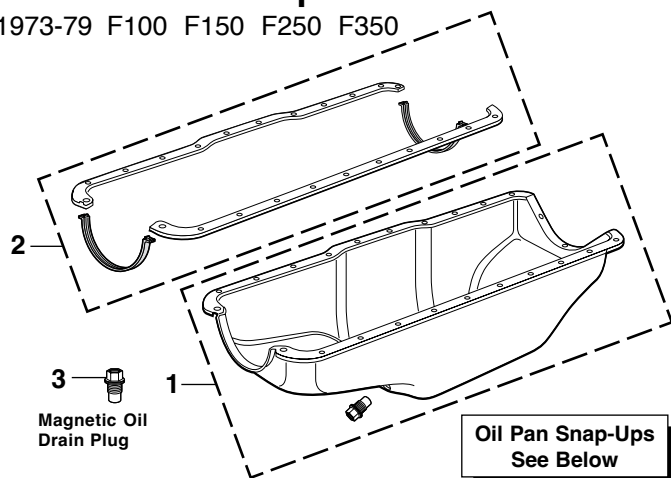

A good oil filter will trap up to 90% of damaging dirt particles. It is recommended to change the oil and oil filter every 3,000 miles. If the oil filter is not changed at recommended intervals it could become clogged, allowing unfiltered oil to circulate throughout the engine, leading to expensive repairs. The cleaner the oil is, the cooler the engine will run.

## Ported Vacuum Switches

1973-79 F100 F150 F250 F350

1978-79 Bronco

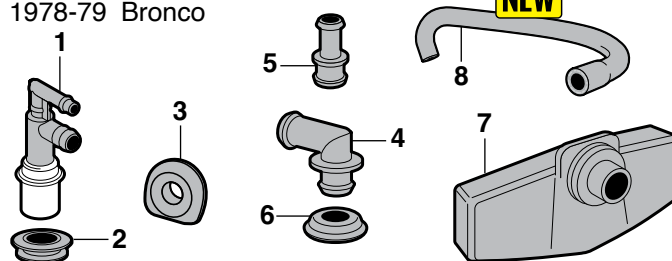

Ported Vacuum Switches (PVS) are heat sensitive devices that turn vacuum pressure on or off to vacuum related components such as EGR valves or distributor advance mechanisms. Can be found on intake manifold, water outlets or engine block. A damaged or malfunctioning PVS can affect engine performance such as horsepower, fuel efficiency and emissions.

## True Off Road Dual 2-1/4" Exhaust Systems

1977-79 F100 F150 F250 1978-79 Bronco

**Performance Turbo Dual Exhaust Systems:** Turbo Exhaust Systems have 2-1/4" in and out flow mufflers to reduce back pressure and give that great low exhaust tone you expect from your truck.

These systems are designed to mount to your stock manifolds. Dual systems run down the passenger side between the drive shaft and frame. Exhaust exits at stock location behind rear wheels.

Frame: Exhaust exits at stock location behind rear wheels.

## Thermal Spark Plug Boot Sleeve Set

Thermal Spark Plug Boot Sleeves provide thermal protection against hot exhaust headers. Double-layer gray fiberglass sleeves are non-conductive and can directly contact hot surfaces without harmful effects. Chemically-resistant 3/4" diameter braided sleeves easily slip over any spark plug wire and boot configuration to protect from temperatures up to 1,200°F. Call or go online and order yours today!

36-6190-F	SPARK PLUG BOOT SLEEVE SET	\$14.95

## Header Wrap

Increase performance by keeping hot exhaust gasses inside the headers for maximum velocity, improved exhaust scavenging and protecting sensitive engine components from high temperatures.

Header Wrap is able to withstand temperatures up to 1,200°F and is made from vermiculite-coated, textured fiberglass yarn woven into a strong, flexible wrap that can easily be cut with scissors.

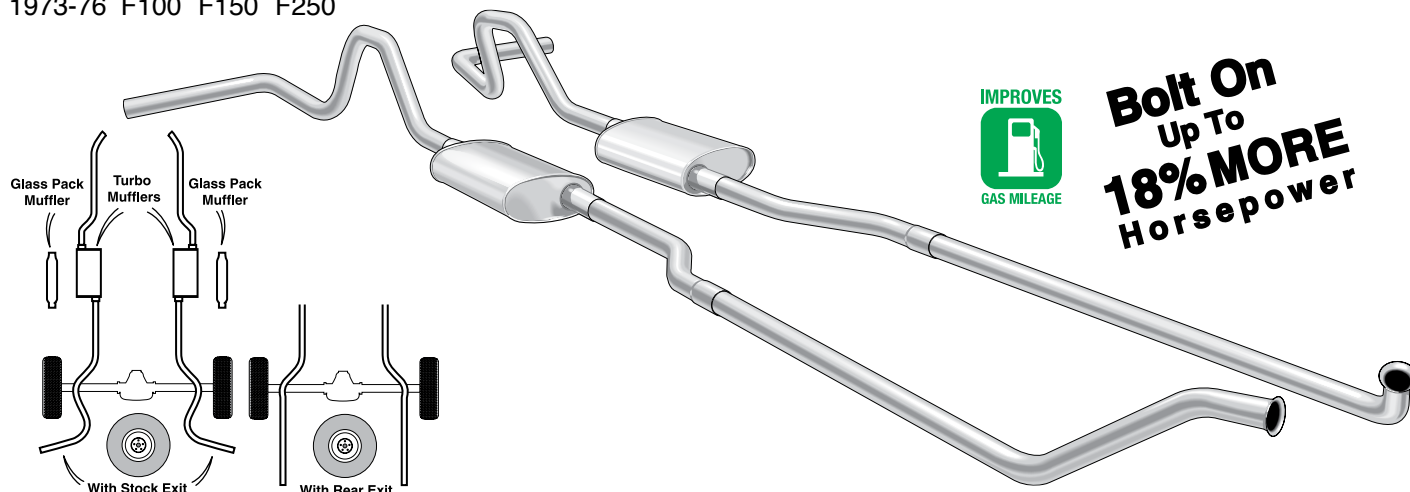

Available in 25 or 50-foot rolls of 1" or 2" widths. Two 50-foot rolls of 2" wide are generally enough to wrap standard V8 headers. Stainless steel locking cable ties keep the wrap securely in place. *Header Wrap can void warranty of some headers. Check header manufacturer's warranty before installing.*

Headers with tight bends should use 1" wide wrap for coverage. Overlap wrap 1/4" for optimum heat dissipation.

## Complete High Performance Dual Exhaust Systems with Bolt-On Convenience

1973-76 F100 F150 F250

Rear exit exhaust systems are designed for clearance of an original size spare tire mounted underneath the bed. If you have an oversize spare, it will have to be removed to use these systems.

Manufactured from 16-gauge aluminized steel that lasts up to twice as long as conventional plain steel systems. Made with modern tube benders utilizing mandrel bends ensuring each bend is smooth flowing increasing exhaust flow by up to 20% over stock systems.

Exhaust systems fit models with rear mount gas tank only.

Exhaust systems are designed to fit longbed trucks. Front extension pipes will need to be cut to fit shortbed models.

## Harmonic Balancer, Puller and Installer

1973-79 F100 F150 F250 F350  
1978-79 Bronco

### Harmonic Balancer Puller

Removes harmonic balancer from engine without risk of damage. Four-slot, heavy-duty yoke handles any pulling job. Extra-long center screw is machined for use with included adaptor tip that centers puller on crankshaft for quick and damage-free removal. Includes five sets of hardened, flange-head bolts in standard and metric thread sizes for most engines. Order today!

### Harmonic Balancer Installer

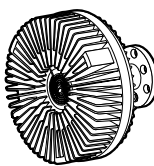

Threaded forcing screw uses a bearing to easily slide harmonic balancer into place. Includes five standard and seven metric threaded adaptors for use on a wide range of engines.

## Air Conditioning Systems

AC, Heat and Defrost Systems are easy to install. Systems mount to the firewall with custom mounting plates using the original heater mounting holes. Hoses pass neatly through the firewall, through a rubber grommet, into the engine compartment. Adapters connect the factory louvers to the unit for an original appearance.

A custom condenser assembly includes mounting brackets, receiver/dryer and pre-formed aluminum lines to pass through the core support. The included compressor has a plain finish, AC hose kit is universal and will require fitting and crimping hoses to complete the installation. AC Compressor brackets are not included.

**Radiator Core Size:** The height and width of the central part of the radiator, between the tanks and the side pieces. Consists of parallel rows of tubes and fins.

**Transmission Oil Coolers:** Trucks with automatic transmissions require radiators equipped with a transmission oil cooler. Radiators with oil coolers are also used on manual transmission trucks, the oil cooler portion of the radiator is simply not used.

**Rows:** The number of rows refers to the number of parallel rows of tubes in the core.

## Electric Cooling Fan Kit Keeps Your Engine Cool

Part #	Size	Motor	CFM	Amp Draw
38-4892-F	16-7/8"W X 15-7/8"T X 3.87"D	160 watt	1950	13.1

**Electric Cooling Fan** and high-performance motor give maximum air delivery while working off the electrical system. Fan blade and shroud are constructed of glass-filled nylon for strength and durability; includes mounting hardware as well as easy-to-follow instructions.

**Fan Mounting Bracket Kit** is recommended for optimum mounting strength and performance on all electric cooling fans.

**#38-4894-F Adjustable Thermostat**, sold separately, operates fan only when needed. Adjustable Thermostat is adjustable from 150°-240°F.

**Quick Re-Installation Kit** contains everything needed to reinstall cooling fan if removed.

## Dual Electric Cooling Fan Assembly ... For Improved Cooling, Fuel Economy and Power

Part #	Size	Motor	CFM	Amp Draw
38-4889-F	26"W X 15"H X 3.23"D	2 X 130 watt	2310	14.4
38-4890-F	26"W X 15"H X 3.62"D	2 X 160 watt	2600	24.8

**IMPROVES GAS MILEAGE** Dual Electric Cooling Fan Assembly provides increased horsepower and improved MPG. Electric fans provide increased cooling at idle when needed most and eliminate the draw of a mechanical engine-driven fan. Increased airflow across A/C condenser gives cooler, more consistent A/C temperatures at low engine speeds.

Dual Electric Fan Assemblies have a quiet S-blade design and include a wiring harness, relay, adjustable fan temperature switch, mounting brackets and installation instructions.

A/C Cooling Fan Harness activates the electric cooling fan when the A/C compressor clutch is engaged. Kit includes heavy-gauge wire harness, relay, 30 amp fuse, electrical connections and installation instructions.

## High Performance Spark Plug Wire Set

47-2871-BL

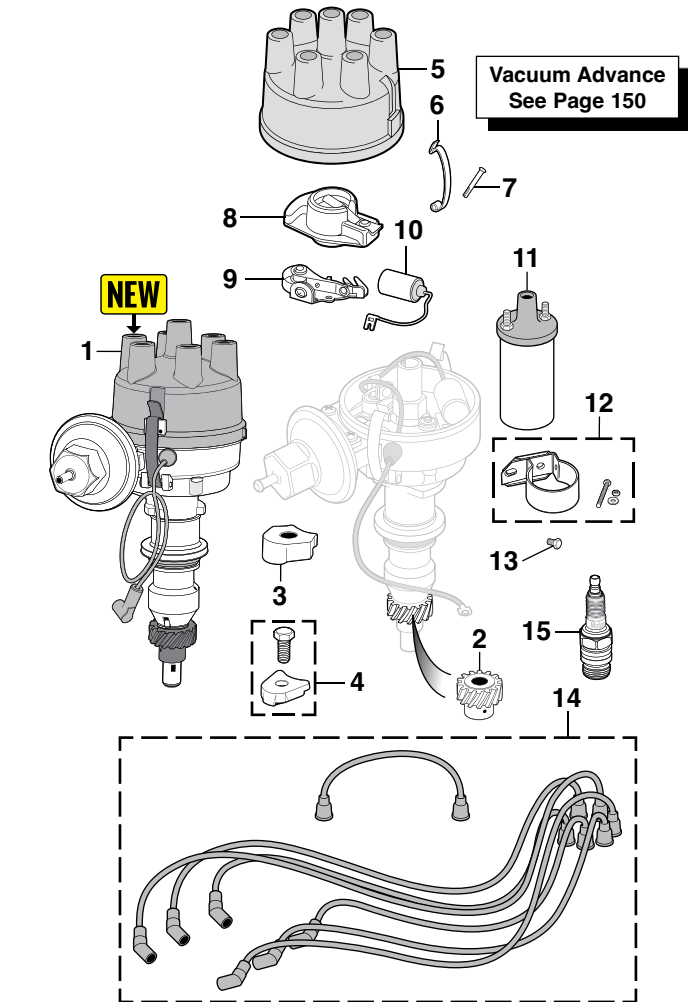

Upgrade current spark plug wires to these low resistance, high performance 8mm silicone wire sets with eight pre-terminated spark plug boots. Due to varying exhaust manifold and header styles, ignition wires must be cut to length and terminals must be crimped with an ignition wire crimp tool; sold separately. Choose the application based on the spark plug boot configuration (straight, 45° or 90°) that will work best for your truck. Distributor end terminals, boots and detailed instructions are included. ## Ignitor II Electronic Ignition System

30-Month  
Warranty

Senses current level in the coil and adjusts dwell to maintain peak energy throughout the entire rpm range. Develops an average three times more available energy between 3,000 and 5,000 rpm and nearly doubles available plug voltage. High rpm performance is improved with the new Flame-Thrower II™ coil. Peak current level is reached just prior to spark, so ignition energy is sustained with less heat build up, increasing coil and module life. Adjusts spark timing over the entire rpm range to compensate for the inherent electronic delay, resulting in more stable timing. Senses incorrectly wired or key left on and shuts down the system, protecting the coil and other components from damage.

## WeatherPak Wire Extractor Tools

These WeatherPak Wire Extractor Tools will save you time and hassle when servicing your vehicle's wiring system. Tools are engineered to easily release and remove OEM terminals from their WeatherPak housings, as well as releasing the lock tab on Packard 56 and Pak-Con terminals. This 3-piece set comes with a narrow pick (.05" wide), wide pick (.09") and tubular-shaped extraction tool. Handles are color-coded for easy identification.

PART	DESCRIPTION	REQD	PRICE
42-1398	WEATHERPAK WIRE EXTRACTOR TOOLS	(1)	\$9.95

## Wire Terminal Extractor Tools

This Wire Terminal Tool Kit is designed to release and extract wires from terminals without damage. The single blades have a bevel ground onto the end for working on small terminals found on newer vehicles. Red is specially designed for Pak-Con and WeatherPak terminals. Silver has prongs to depress the 'barbs' on conventional terminals. The handle slips over the probes to protect your hand as well as provide extra leverage. This complete kit comes in a sturdy blow-molded case for protection and long life and is a must-have for any do-it-yourselfer's toolbox.

PART	DESCRIPTION	PRICE
42-1399	WIRE TERMINAL TOOL KIT	\$53.95

## Split Braid Flex Loom and Wire Loom Installation Tool

36-2600-F

Unique black flexible braided construction features a 25% edge overlap that will allow for the sharpest of bends without distorting or splitting open. Lateral split design of the flex loom allows for easy installation of multiple wires. Self-wrapping feature ensures the flex loom will return to its original size and shape without the

need to use fasteners or tape. Protect your vehicle's wiring, cables, hoses and tubing from unnecessary wear while adding a clean look. Available in three sizes: 1/4", 1/2" or 3/4" diameter.

36-2597-F

Wire Loom Installation Tool makes feeding wires into split wire looms a snap. Insert the wiring into the channel of the tool, rotate the handle to lock wiring in place and insert the loom separator into the split loom. Gently pull the tool through the loom while holding onto the wires. Available in three convenient sizes.

## Wiring Harness Designed Specifically for Your Classic Truck

1973-79 F100 F150 F250 F350 1978-79 Bronco  
This quality Wiring Harness from American Autowire will rewire truck from headlights to tail lights and is able to add many options and accessories. The 18 fuse, 29-circuit fuse box and mounting plate install under dash. Easy-to-follow, illustrated installation manual included.

**American  
Autowire**

Harness is designed to accommodate truck's original switches and connections and work with many aftermarket components such as custom steering columns, electric fans, gauges, HEI distributors, air conditioning and more. The instrument cluster wiring disconnects from the main harness to assist service.

New switches including headlight, dimmer, door jamb, wiper and ignition are supplied. Standard features include headlight connectors, parklight connectors, front harness grommets, underdash courtesy light wiring, original style rear light sockets, weatherproof boot and tube assemblies.

F-Series models with dual fuel tanks and Bronco models with a rear power window require the use of additional harnesses, sold below.

## Universal Wiring Harness ... Finish the Job Right the First Time

Universal Wiring Harness from Painless Wiring is a comprehensive approach to rewiring your truck's electrical system. Factory assembled harness features a prewired fuse block with modern blade-type fuses and built-in additional circuits. Wiring Harnesses are available in 21-circuit and 28-circuit assemblies.

High quality terminals and color coded and labeled GXL/XLPE wire (cross-linked polyethylene, -60°F to 275°F abrasion resistant) are used. Includes conventional and 1-wire alternator leads. Terminals are provided to make adapting to any aftermarket steering column easier. Standard features include starter wiring, tachometer lead, single headlight plugs, third brake light, horn relay, turn signal and 4-way hazard flashers, fuses, terminal ends and wire ties. Easy-to-follow instructions and schematics are included.

## Underhood Lamp

42-5503

**Installation Tip:** Since all hoods and mounting locations are different, a slight adjustment to mounting bracket may be needed to assure light goes out when hood is closed. After mounting bracket and wires have been installed, apply pressure to the mounting bracket to change the angle as needed for proper operation.

Underhood Lamp adapts to any 12 volt truck and helps illuminate the engine bay. No need for wiring into a switch, bulb socket base is gravity activated; lamp comes on when hood is raised and goes out when hood is lowered. Mount underneath hood and connect lamp wire to any constant 12 volt source. Moisture proof in-line fuse is integrated into the wire for protection.

## Electronic Flasher ... For LED Lights

An Electronic Flasher is recommended when upgrading to LED bulbs or light assemblies. Due to the lower current draw of LED lighting, the factory flasher may cause inconsistent flash rates, no flash or indicate that a bulb is out.

## Custom Light Bulbs

**Halogen Bulb Tech Tip:** Always handle halogen bulbs by the plastic base to prevent contaminants on the glass from shortening the life of the bulb.

### Halogen Blue-Coated Headlight Bulbs

36-0291-F

Replace the white halogen bulbs with a halogen blue-coated bulb. Blue-coated bulb creates an intense white light, giving the cool look of HID (high intensity discharge) lighting without the high price; call or go online and order yours today!

### Superwhite Bulb Set Produces 30% More Light

36-0310-F

Superwhite headlight bulbs produce 30% more light while retaining the street legal wattage. Superwhite bulbs use a proprietary mixture of premium gases that includes Xenon, which cools the light filament, improving the efficiency and light output of the bulb, unlike standard halogen bulbs which use less efficient argon gas.

Superwhite bulbs operate in the Kelvin color temperature range of 4000-4200K, producing a brighter, white light. Traditional halogen bulbs operate at 2600-3000K, emitting a more yellowish appearance. Sold in sets of two. Call or go online and order yours today!

LED bulbs have no filament, making them less sensitive to vibrations, and illuminate 140 times faster while lasting up to 20,000 hours, much longer than conventional incandescent bulbs. They emit less heat and use only 15% of the energy required by incandescent bulbs, reducing the load placed on a vehicle's electrical system.

## Driving Light Set

Driving lights provide a longer, more focused beam pattern for improved long-range vision. Features include reinforced steel housing with black finish and adjustable chrome mounting bracket with 10mm mounting stud; and state-of-the-art reflector which gives maximum light output from a 4-1/2" diameter light. Lights are complete with illuminated push button switch, 12-volt relay, all necessary wiring, mounting hardware, protective lens covers and high efficiency halogen 12V 55W replaceable bulbs.

38-1274-F

For added style, replace the white halogen bulb with a halogen blue-coated bulb. The blue-coated bulb creates an intense white light which gives the cool look of HID (high intensity discharge) lighting without the high price.

## Custom Headlights ... Brighter Light for Greater Distance

These OE-quality headlights feature an aluminum die-cast housing with a protective finish coating, making the housing corrosion free. Maximum light output is produced by brighter light focused on the road for a greater distance.

The strong, semi-hardened, crystal clear glass lens does not diffuse the light like traditional headlight lenses. A high-efficiency white halogen 12V 60/55 watt replaceable bulb is included. DOT and SAE approved.

#36-0299-F includes a white LED halo accent light that can be wired directly to any 12-volt circuit.

## Parklight Conversion Kit

47-4252

47-0334

Enjoy the benefits and the intensity of LED lights while retaining the original look of your classic truck. This LED high-tech conversion kit bolts right into the stock housings and adds safety and brightness while using only 15% of the energy required by incandescent bulbs. Benefits include: 100 degree viewing angle, no filament to burn out and LEDs which illuminate 140 times faster than conventional incandescent bulbs. Converts the parklights into very bright and visible LEDs.

For maximum lighting intensity benefits, replace your aged, weathered lenses with new lenses.

## Flareside LED Tail Lights

1977-79 F100 F150 F250

New technology previously only on high-end luxury cars is now available for trucks! These tail lights quickly alert other drivers of your intentions with LED bulbs that illuminate 140 times faster than conventional incandescent bulbs, which translates to a gain of 20+ feet of reaction distance.

### Additional LED benefits:

LEDs have no filament, which means they are less sensitive to vibrations, and they can last up to 20,000 hours. They use only 15% of the energy required by incandescent bulbs, reducing the load placed on the truck's charging system and less heat is emitted.

Tail light lenses are a direct replacement for stock tail lights and are made to fit factory specifications. No modifications to fit required. They feature LEDs for brake lights, parking lights, turn signals, backup lights and license plate light.

An Electronic Flasher is recommended when upgrading to LED bulbs or light assemblies. Due to the lower current draw of LED lighting, the factory flasher may cause inconsistent flash rates, no flash or indicate that a bulb is out.

This chart shows shipping charges on orders up to \$500. Parts must be 108 inches or less and weigh 70 pounds or less to qualify. If any part does not meet these qualifications, your order will be delivered by ground for additional charges.

All orders will ship complete. Any additional delivery charges will be added to your total as needed, including Oversize Part charges or overweight charges.

We will need a daytime phone number with your order. If there is a problem with your order, we will attempt to contact you three times. If we are unsuccessful, your order will be cancelled 5 days after that third failed attempt.

### What You Need to Know When Shipping Problems Occur

Please open your package(s) as soon as possible and make certain that everything is accounted for and nothing was damaged in shipment. Damaged shipments are the responsibility of the carrier and must be reported to the carrier within 15 days of receipt.

If the package looks damaged when it arrives, open it with the delivery person present, so that they can make an immediate report of damages and discrepancies. If the damage is not obvious at the time of delivery, or if the package was left for you by the shipping company, contact their customer service as soon as possible to make your claim.

On Truck Freight shipments, it is your responsibility to check your order and have the driver note any damage on the freight bill before you sign for your item(s).

Please keep all packing, packaging and contents until your claim has been settled with the shipping company.

### What You Need to Know About Shipping Internationally

All international orders ship complete. Shipping charges must be prepaid in U.S. funds. Brokerage, duties, taxes, and fees associated with the order are paid by the customer. We do not accept personal checks on international orders.

## Retail Delivery Fee Notice

*Some states are starting to pass legislation requiring us to collect a Retail Delivery Fee on shipments. Check with your state's department of revenue for more information.*

*For those customers living in states that require this, the extra fee will be added to each purchase that is taxable under the state code.*

### What You Need to Know Before Ordering:

We are excited that you've decided to make us a part of your journey! Whether you are rebuilding from the ground up or just adding some distinctive touches to your vehicle, we are proud to give you a hand.

In addition, we'd love to see what you've been up to with your projects, so please log on to [lmctrucklife.com](http://lmctrucklife.com) and share your stories and pictures.

Understand that we are not trained automotive technicians. We want you to consult with mechanics regarding technical advice. Technical information is also included in the workshop manuals shown in this catalog. Please take the time to consult these resources if you feel you need to.

On those occasions that we've run out of a part on your order, chances are that it's already on its way to us. These items are listed as backordered on your invoice and will be sent your way as soon as possible. If you're not interested in waiting for your backordered product, just call our customer service line at (800) 222-5664, and we will cancel it and refund any money that has been paid.

You can also write "No Backorders" on your order form before you send it to us, and we'll make sure only to ship the products we currently have in stock.

Some parts have extra charges. Please consult below to make sure you understand these charges and so you aren't surprised later.

#### Part Number Definitions

- T - After a part number means that part must be shipped Truck Freight. An additional \$150.00 will be charged to your order for delivery in the 48 contiguous United States. Orders outside of the 48 states will be quoted. Additional delivery time required.
- \* - After the sell price means Oversize Part Charge. Your order will incur a charge of \$20.00 for each oversized part. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.
- \*\* - After the sell price means Oversize Part Charge. Your order will incur a charge of \$50.00 for each oversized part. Due to packing and/or transportation requirements, please allow additional time for delivery. Oversized Parts are not available for air delivery.
- R - After a part number means Remanufactured Part. No core charge.

And one more thing, the part our lawyers make us say: We reserve the right to refuse service or shipment to anyone. We reserve the right to collect a service charge of \$20 for a returned check and to hold any shipments until the fee is collected.

Thank you for your support. Best of luck with all your projects!

### What You Need to Know Before Returning:

If only we lived in a perfect world! Unfortunately, we don't, and things can go wrong. When that happens, we do our best to try to make things right again. But we need your help as well.

All returns must be in like new condition and in the original packaging. Please include a copy of your invoice, as that will make the process quick and easy.

We refund your payment the same way you paid. Refunds of less than \$1 will not be made except by customer request.

We can't be responsible for damages, so please package your returned items carefully.

If you can ship the item back to us ground or USPS within the 48 contiguous United States, you don't need to call for authorization. Just send it to us at:

**17301 W. 113th St, Lenexa, KS 66219**

If we shipped you the wrong item, send it back, and we'll send the right item and reimburse you the ground rate for your return.

We can't accept anything that has been installed (unsuccessful attempts do count), disassembled, drilled, welded, cut, painted, or modified in any way, so please make sure to check and doublecheck the fit before starting any work.

If you are returning a kit, it needs to contain all the parts you received. No partial kits may be returned.

Electronic media (CDs, DVDs) cannot be refunded once they are opened. However, if it is not working properly, it can be exchanged for the same part number.

Please call our customer service line for a return authorization if your part was delivered outside of the 48 contiguous United States.

If you want to return something you bought over a year ago, please call our customer service line for return authorization.

You must call Customer Service when returning a Truck Freight item.

**Customer Service Line: (800) 222-5664**

**¿Habla Español? (855) 456-2288**

A 20% non-refundable restocking fee will be added to anything that's over a year old (unless the extended manufacturer warranty is still in effect, of course) as well as to any unauthorized Truck Freight returns.

And the legal part again: We have the right to refuse any return we deem unfit for resale. We also have the right to refuse any shipments where the shipping charges, duties, customs, etc., are not prepaid.

## Ol' Blue Is Definitely a Head Turner

*Dale Hickman and His 1979 Ford F150 4x4*

It was white when I bought it, and I drove it for a while. Then in March of 2019 I had 2 heart attacks at the age of 53. When I came home from the hospital I decided to do what I've always dreamed of doing and that's having a truck restored. I used to own a '78, but life happens and I sold it. I found this '79 some 30 years later and bought it.

I contacted a guy who was a Ford specialist named Bobby Baldwin who started the restoration on it. He cut every piece of rust out and replaced it with new metal, installed my brand-new Jasper 351m engine, had 90% of the body work done, then he was diagnosed with cancer a year and a half into the restoration. Sadly, he passed away before finishing it, so I had to pick it up and take it to another shop to be finished.

I have always been a Ford man ever since my dad owned one when I was just a child. As you can tell, the interior has been done, and it has new 3" Flowmaster dual exhaust, new 15x10 wheels, sits on a 4" lift kit, and has a 3 speed with granny gear. The paint job is amazing, and in the past year that I've had it back, I have won 8 awards with it at car shows. It is strictly a show truck, and I am looking forward to another great year with it.

Thank you, LMC Truck, for supplying me with most of the new parts for my restoration. Both fenders, doors, new floor for the bed, bumpers, just way too much to mention. You all are great!!!! Ol' Blue is definitely a head turner.
